

CAMBRIDGE INTERNATIONAL EXAMINATIONS
International General Certificate of Secondary Education

MARK SCHEME for the October/November 2013 series

0625 PHYSICS

0625/32

Paper 3 (Extended Theory), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

NOTES ABOUT MARK SCHEME SYMBOLS & OTHER MATTERS

- M marks are method marks upon which further marks depend. For an M mark to be scored, the point to which it refers **must** be seen in a candidate's answer. If a candidate fails to score a particular M mark, then none of the dependent marks can be scored.
- B marks are independent marks, which do not depend on other marks. For a B mark to be scored, the point to which it refers must be seen specifically in the candidate's answers.
- A marks In general A marks are awarded for final answers to numerical questions. If a final numerical answer, eligible for A marks, is correct, with the correct unit and an acceptable number of significant figures, all the marks for that question are normally awarded. It is very occasionally possible to arrive at a correct answer by an entirely wrong approach. In these rare circumstances, do not award the A marks, but award C marks on their merits. However, correct numerical answers with no working shown gain all the marks available.
- C marks are compensatory marks in general applicable to numerical questions. These can be scored even if the point to which they refer are not written down by the candidate, **provided subsequent working gives evidence that they must have known it**. For example, if an equation carries a C mark and the candidate does not write down the actual equation but does correct substitution or working which shows he knew the equation, then the C mark is scored. A C mark is not awarded if a candidate makes two points which contradict each other. Points which are wrong but irrelevant are ignored.
- Brackets () around words or units in the mark scheme are intended to indicate wording used to clarify the mark scheme, but the marks do not depend on seeing the words or units in brackets, e.g. 10 (J) means that the mark is scored for 10, regardless of the unit given.
- Underlining indicates that this must be seen in the answer offered, or something very similar.
- OR / or indicates alternative answers, any one of which is satisfactory for scoring the marks.
- e.e.o.o. means "each error or omission".
- o.w.t.t.e. means "or words to that effect".
- c.a.o. means "correct answer only".
- Spelling Be generous about spelling and use of English. However, do not allow ambiguities, e.g. spelling which suggests confusion between reflection/refraction/diffraction or thermistor/transistor/transformer.
- Not/NOT indicates that an incorrect answer is not to be disregarded, but cancels another otherwise correct alternative offered by the candidate i.e. right plus wrong penalty applies.
- Ignore indicates that something which is not correct or irrelevant is to be disregarded and does not cause a right plus wrong penalty.

Page 3	Mark Scheme	Syllabus	Paper
	IGCSE – October/November 2013	0625	32

e.c.f. meaning "error carried forward" is mainly applicable to numerical questions, but may in particular circumstances be applied in non-numerical questions. This indicates that if a candidate has made an earlier mistake and has carried an incorrect value forward to subsequent stages of working, marks indicated by e.c.f may be awarded, provided the subsequent working is correct, bearing in mind the earlier mistake. This prevents a candidate being penalised more than once for a particular mistake, but **only** applies to marks annotated e.c.f.

Significant Figures

Answers are normally acceptable to any number of significant figures ≥ 2 . Any exceptions to this general rule will be specified in the mark scheme.

Units Deduct one mark for each incorrect or missing unit from a final answer that would otherwise gain all the marks available for that answer: maximum 1 per question.

Arithmetic errors

Deduct one mark if the **only** error in arriving at a final answer is clearly an arithmetic one.

Transcription errors

Deduct one mark if the only error in arriving at a final answer is because given or previously calculated data has clearly been misread but used correctly.

Fractions Only accept these where specified in the markscheme.

Page 4	Mark Scheme	Syllabus	Paper
	IGCSE – October/November 2013	0625	32

- 1 (a) measure area (under curve) B1 [1]
- (b) draws tangent at steepest part by eye, within thickness of lines
accept triangle/lines to indicate values on straight steepest part of curve B1
- finds Δv and Δt from tangent or at straight steepest part of curve B1
- any v divided by any t or in equation B1
- $3.0 - 4.2 \text{ m/s}^2$ B1 [4]
- (c) uses 62 and 10 NOT 2×62 C1
6.2 m/s A1 [2]
- [Total: 7]**
- 2 (a) evidence of division of 12 mm by 0.080 s C1
- ($v =$) 0.15 m/s or 150 mm/s C1
- uses $t = \text{his } (\Delta)v/a$ in any form C1
- ($t = [0.15 - 0] / 0.03 = 0.15 / 0.03 = 5(.0) \text{ s}$ accept 1 sig. fig.
allow e.c.f. from clearly identifiable wrong speed A1 [4]
- (b) use of F / a OR $F = ma$ in any form, numbers or symbols, ignore g C1
- (0.06/0.03=) 2(.0) kg accept 1 significant figure A1 [2]
- (c) greater M1
- because mass is less, ignore comments about force A1 [2]
- [Total: 8]**
- 3 (a) (i) (both have) magnitude o.w.t.t.e. B1
- (only) vector has direction B1 [2]
- (ii) valid example of vector quantity
e.g. displacement, weight, force, velocity B1
- valid example of scalar quantity
e.g. distance, length, time, pressure, mass, energy accept height B1 [2]

Page 5	Mark Scheme	Syllabus	Paper
	IGCSE – October/November 2013	0625	32

	(b) each vector to scale and correct angle, larger vector clockwise by acute angle from smaller	B1	
	parallelogram or correct two sides of triangle	B1	
	resultant drawn correct, from his parallelogram or his sides of triangle	M1	
	magnitude $4.5 - 5.4 \times 10^4 \text{ N}$, accept 1 sig. fig. if exact AND direction $4 - 12^\circ$ from $3 \times 10^4 \text{ N}$ force OR $8 - 16^\circ$ from $2 \times 10^4 \text{ N}$ force accept values from diagram	A1	[4]
			[Total: 8]
4	(a) irregular/random/haphazard movement	B1	
	any mention of different <u>directions</u> or clearly described	B1	[2]
	(b) <u>smoke</u> particles condense atoms, molecules etc. AND (invisible) <u>air molecules</u>	B1	
	air and smoke/dots collide ignore other collisions	B1	[2]
	(c) dots move in or out of focus/disappear OR appear brighter/dimmer	B1	[1]
			[Total: 5]
5	(a) black can/B loses heat energy quicker/cool faster OR polished can loses heat energy slower/cool slower	M1	
	black radiates/emits more OR polished radiates/emits less ignore anything about absorption	A1	[2]
	(b) (i) any four from:	B4	
	viable experiment e.g. pour in water and measure temperature ignore methods with external thermometers (for this point only)		
	pour (hot) water into both cans to <u>same level</u> / <u>same amount</u>		
	place thermometers in <u>same position</u> relative to each can/detail relating to stirring		
	thermometers not touching the metal of can		
	observe change of temperature		
	correct detail of timing		
	repeat readings		[4]

Page 6	Mark Scheme	Syllabus	Paper
	IGCSE – October/November 2013	0625	32

	(ii) use tiles as lids reduce convection/evaporation (to room)		M1 A1	
	OR alternative method put tiles under cans reduce, ignore prevent, conduction (to bench)		(M1) (A1)	
	for both methods, ignore other modes of heat transfer, ignore place tiles around can			[2]
	(c) black can/B		M1	
	black absorbs (radiation) better, ignore anything about emission		A1	[2]
				[Total: 10]
6	(a) light in air BOX 5 3×10^8 m/s sound in air BOX 2 300 m/s sound in water BOX 3 1500 m/s		B1 B1 B1	[3]
	(b) distance = speed \times time in any form NOT speed = $2d/t$		C1	
	$t_{\text{air}} = 120 \div$ value for speed of sound in air		C1	
	$t_{\text{rail}} (= 120/5000) = 0.024$ s		C1	
	(time difference =) candidate's $t_{\text{air}} -$ candidate's t_{rail} correctly evaluated (expect $0.400 - 0.024 = 0.376$ s)		A1	[4]
				[Total: 7]
7	(a) (i) BOX 2 ticked virtual BOX 3 ticked magnified		B1 B1	
	(ii) AB circled		B1	[3]
	(b) (i) normal at M towards C		B1	[1]
	(ii) $40^\circ \leq$ angle of reflection $\leq 50^\circ$		B1	[1]
	(iii) any <u>clear</u> indication that OP is also the reflected ray		B1	[1]
	(iv) lines extended back from M and P <u>to meet</u> to the right of mirror AND indication of intersection as image position		M1	
	image within 25 mm of right hand margin line AND higher than P but within 16 mm		A1	[2]
				[Total: 8]

Page 7	Mark Scheme	Syllabus	Paper
	IGCSE – October/November 2013	0625	32

- 8 (a) (one third length so) one third R , accept any division by 3 C1
(half area so) twice R , accept any doubling, including divide by $\frac{1}{2}$ C1
(resistance = $0.45 \times \frac{2}{3}$) = $0.3(0)\Omega$ accept 1 sig. fig. A1 [3]
- (b) (i) $1(\Omega)$ and $3(\Omega)$ used in correct parallel formula C1
 $2(\Omega)$ added to candidate's parallel resistance C1
2.7 or 2.8 or 2.75Ω A1 [3]
- (ii) any 2 from:
 $I_1 = I_4$ OR $I_1 = I_2 + I_3$ OR $I_4 = I_2 + I_3$
OR other correct relevant equation/inequality e.g. $I_4 = 4I_3$, $I_4 > I_3$ B2 [2]
- (iii) any 2 from:
 $V_1 = V_4$ OR $V_1 = V_2 + V_3$ OR $V_4 = V_2 + V_3$
OR correct relevant inequality e.g. $V_1 > V_3$ B2 [2]
- [Total: 10]**
- 9 (a) (i) current/electricity could flow through/across switch due to dampness / humidity
OR water (good) conductor B1
danger of shock/electrocution B1
accept alternative:
short (circuit) (B1)
(danger because) lights go out when fuse blows (B1) [2]
- (ii) pull switch with long cord of insulating material
OR normal switch outside workroom
OR switch with non-contact operation/insulating cover/sensor actuation B1 [1]
- (b) (i) friction with hose M1
reasoning relating to charge moved to/from aircraft OR to/from hose
OR rubber insulates A1 [2]
- (ii) (water conducts) charge to/from aircraft OR away/to ground OR through
tyres/wheels
OR earthing o.w.t.t.e. B1 [1]
- [Total: 6]**

Page 8	Mark Scheme	Syllabus	Paper
	IGCSE – October/November 2013	0625	32

10 (a) (i)	AND gate	B1	
	(ii) correct symbol must have 2 inputs, 1 output concave input side, somewhat pointed on output side with small circle	B1	[2]
(b) (i)	HIGH/1	B1	
	(ii) HIGH/1	B1	[2]
(c)	transistor circled	B1	[1]
		[Total: 5]	
11 (a) (i)	90	B1	
	(ii) 39	B1	[2]
(b) (i)	tick corresponds to candidate's (a)(ii)	B1	[1]
	(ii) zirconium c.a.o.	B1	[1]
(c)	X (and) Z (are isotopes of same element)	M1	
	same proton number	A1	[2]
		[Total: 6]
