CAMBRID

INTERN

These mark schemes are published as an aid to teachers and students, to indicate the requirements of the examination. They show the basis on which Examiners were initially instructed to award marks. They do not indicate the details of the discussions that took place at an Examiners' meeting before marking began. Any substantial changes to the mark scheme that arose from these discussions will be recorded in the published Report on the Examination.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the Report on the Examination.

CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the November 2003 question papers for most IGCSE and GCE Advanced Level syllabuses.

	maximum	mir	nimum mark re	equired for gra	de:
	mark available	А	С	Е	F
Component 1	40	-	27	23	19
Component 2	80	-	51	39	29
Component 3	80	54	33	-	-
Component 5	60	49	39	31	24
Component 6	40	31	24	18	13

Grade thresholds taken for Syllabus 0625 (Physics) in the November 2003 examination.

The threshold (minimum mark) for B is set halfway between those for Grades A and C. The threshold (minimum mark) for D is set halfway between those for Grades C and E. The threshold (minimum mark) for G is set as many marks below the F threshold as the E threshold is above it.

Grade A* does not exist at the level of an individual component.

	PHYSICS – NOVEMBER 2003	0625	2

NOTES ABOUT MARK SCHEME SYMBOLS

- B marks are independent marks, which do not depend on any other marks. For a B mark to be scored, the point to which it refers must actually be seen in the candidate's answer.
- M marks are method marks upon which accuracy marks (A marks) later depend. For an M mark to be scored, the point to which it refers **must** be seen in the candidate's answer. If a candidate fails to score a particular M mark, then none of the dependent A marks can be scored.
- C marks are compensatory method marks which can be scored even if the points to which they refer are not written down by the candidate, provided subsequent working gives evidence that they have known it, e.g. if an equation carries a C mark and the candidate does not write down the actual equation but does correct working which shows he knew the equation, then the C mark is scored.
- A marks are accuracy or answer marks which either depend on an M mark, or allow a C mark to be scored.
- c.a.o. means 'correct answer only'.
- e.c.f. means 'error carried forward'. This indicates that if a candidate has made an earlier mistake and has carried his incorrect value forward to subsequent stages of working, he may be given marks indicated by e.c.f. provided his subsequent working is correct, bearing in mind his earlier mistake. This prevents a candidate being penalised more than once for a particular mistake, but **only** applied to marks annotated 'e.c.f.'.
- e.e.o.o. means 'each error or omission'.
- Brackets () around words or units in the mark scheme are intended to indicate wording used to clarify the mark scheme, but the marks do not depend on seeing the words or units in brackets, e.g. 10 (J) means that the mark is scored for '10', regardless of the unit given.
- <u>Underlining</u> indicates that this **must** be seen in the answer offered, or something very similar.
- Un.pen. means 'unit penalty'. An otherwise correct answer will have one mark deducted if the unit is wrong or missing. This **only** applies where specifically stated in the mark scheme. Elsewhere, incorrect or missing units are condoned.
- OR/or indicates alternative answers, any one of which is satisfactory for scoring the marks.

		d = 37.5 (cm) (allow e.c.f.)		1
		all x, y, d consistently in mm, cm or m (unit stated at least onc	e)	1
		x, y d units stated every time		1
		t value correct arith		1
		t values within 0.5 cm of each other		1
(g	a)	average t; correct method		1
13	- /	final answer to 2/3 sf		1

TOTAL 15

	Page 2	2	Mark Scheme	Syllabus	Paper
			IGCSE EXAMINATIONS – November 2003	0625	5
3		Trace	e		
		Neat	thin lines		1
		Lines	s complete		1
		A and	d B correct positions		1
		New	B correct		1
		i = r ((by eye)		1
		CD a	t least 5 cm		1
		Seco	nd CD at least 5 cm		1
		Strai	ght lines extended to X		1
		XA d	rawn and Y labeled		1
	(j)	AY c	orrect to 2 mm		1
		YX c	orrect to 2 mm		1
		AY a	nd YX same to within 10 mm		1
	(k)	Thick	ness of mirror OR thickness of pins OR thickness of lines		1
	(I)	Preca	aution (pin separation, view bases, vertical pins)		1
		Reas	son		1
				тс	TAL 15
4.	(b)–(g) x in m, cm or mm			1	
		Vin	V		1
		k in \	//m, V/cm or V/mm		1
		corre	ct x values (0.200, 0.400, 0.800 m)		1
		all x t	to nearest mm		1
		x con	nsistent sf		1
		evide	ence of V to better than 0.5 V		1
		all V	to better than 0.5 V		1
		3 k va	alues		1
		Chec	k second k value, correct		1
		all k t	to 2 sf OR all k to 3 sf		1
		all k s	same to within 10%		1
	(h)	(volta	age increases with length)		1
		OR v	oltage proportional to length		2
		k = c	onstant OR figures correctly quoted		1

INTERNATIONAL GCSE

MARK SCHEME

MAXIMUM MARK: 40

SYLLABUS/COMPONENT: 0625/06

PHYSICS Alternative to Practical

	Page 1	Mark Scheme Syllat	ous	Paper
	~	IGCSE EXAMINATIONS – NOVEMBER 2003 062		6
1	(a)	wind string round more than once		1
		divide measured length by number of turns to find c		1
	(b) (i)	correct diagram, blocks parallel, one at each end		1
	(ii)	119 mm OR 11.9 cm to 121 mm OR 12.1 cm		1
	(c)	V = 32.39 to 32.41 cm ³		1 1
	(d) (i)	$V_{m} = 0.5 - 2 \text{ cm}^{3}$		1
	(ii)	correct calculation and 2/3 sf (ignore unit)		1
				TOTAL 8
	(a) (i)(ii)	2 neat continuous rays (thickness up to as EF)		1
	(iii)	normal where incident ray meets mirror (90° by eye)		1
	(iv)	i = 20° \pm 1° (allow e.c.f. if mark for normal not scored)		1
	(b) (i)(ii)	lines complete and neat with AX correctly intersecting		1
	(iii)	AY = 5.9 – 6.1 cm AND YX = 5.5 + 0.3 cm		1
	(c)	any one from: thickness of mirror thickness of lines thickness of pins		
		judgement of where lines cross		1
				TOTAL 6
	(a)	pointer at 0.35 A		1
	(b) (i)	variable resistor/rheostat/potentiometer		1
	(ii)	V		1
		A		1
		Ω		1
		One R correct		1
		All R correct (6.129, 5.769, 4, correctly rounde	ed)	1
		Consistent sf for R (either all 2 sf or all 3 sf)		1
	(iii)	variable resistor/number of cells		1
	(c)	Voltmeter in parallel with resistors (or power source)		1
		Ammeter next to X		1
		Symbols correct and all connections drawn in		1
				TOTAL 12

	Page 2		Mark Scheme	Syllabus	Paper
			IGCSE EXAMINATIONS – NOVEMBER 2003	0625	6
4	(a)	a) Scales: y-axis 1N = 4 cm; x-axis 1m/s2 = 4/5 cm right way round			1
		Bot	h axes labelled with quantity and unit		1
		Plo	ts to $\frac{1}{2}$ sq (-1 each error or omission, minimum mark z	ero)	2
		Line	e thickness less than 1 mm and no 'blob' plots	1	
		Well judged best fit single straight line			1
	(b)	Large triangle used (> ½ line) clear on graph			1
		Inte	erpolation to ½ sq (if large enough tria	ngle present)	1
		Val	ue 1.38 – 1.48		1
		kg a	and 2/3 sf		1
					TOTAL 10
5	(a)	Tw	o from:		
		san	ne volume of water		
		san	ne starting temperature of water		
		san	ne size/shape/type beakers		
		san	ne thickness/mass/volume of insulator		
		san	ne room temp		2
	(b)	64°	°C (with unit)		1
	(c)	В			1
					TOTAL 4
