### Selina's Jewellery Shop

Selina rents a small shop selling jewellery in the main city in country X. She is a sole trader. She makes most of the jewellery herself but she also buys some items from large manufacturers of jewellery. Most of the jewellery is handmade using silver and gold.

Selina employs 5 workers who serve customers in the shop and 2 office workers who order jewellery and record the accounts for the shop.

Selina only has \$5000 in savings. She wants to expand by opening another shop. She does not know whether to buy or rent a shop. She has seen two shops which would be suitable.

#### Shop 1:

This shop is for sale for \$100000. It is a small shop in a shopping mall in the centre of the city. There are many other jewellery retailers in this shopping mall. Many people visit the mall each day and it is open 7 days a week. There is no room at the back of the shop to make jewellery. Selina thinks that making the jewellery in the shop, so that customers can watch, might attract customers to buy jewellery. Jewellery can be made to the customer's own design while they watch.

#### Shop 2:

This shop is for rent at \$5000 per year. It is located on a main road leading to the city centre. There are many shops nearby but none of them sell jewellery. The shop is large and there is plenty of room at the back of the shop for making jewellery. The shops in this area open 6 days a week.

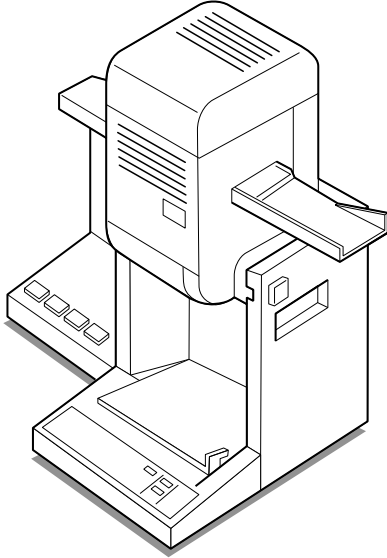

### Appendix 1

Financial information about Selina's existing Jewellery Shop (\$)

	<b>2012</b>	<b>2013</b>
Price per item of jewellery (average)	100	200
Variable cost per item of jewellery	75	150
Fixed cost per month	500	500
Contribution per item of jewellery	25	50
