## **CAMBRIDGE INTERNATIONAL EXAMINATIONS**

**Cambridge International General Certificate of Secondary Education** 

## MARK SCHEME for the March 2015 series

## 0620 CHEMISTRY

0620/62

Paper 6 (Alternative to Practical), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the March 2015 series for most Cambridge IGCSE® components.

P	age 2	2	Mark Scheme	Syllabus	Paper
			Cambridge IGCSE – March 2015	0620	62
1	(a)	the	rmometer (1)		
		cor	ndenser (1)		[2]
	(b)	(i)	ethanoic acid (1)		
			lower boiling point/evaporates first (1)		[2]
		(ii)	temperature reading will rise/gap in liquid coming over/no more contains (1)	ollected at	[1]
	(c)	larg	ger surface area (1)		[1]
	(d)	tes	t: named indicator/pH meter/pH paper (1)		
		res	ult: correct colour change/pH < 7 (1)		[2]
2	(a)	Tal	ole of results		
		all 6 c 5 c	ume boxes completed correctly (3), 7 correct (3) prrect (2) prrect (1) r fewer correct (0)		
		0, 4	15, 48, 72, 74, 75, 75		[3]
	(b)	all 6 c 5 c	nts plotted correctly, including origin (3), 7 correct (3) orrect (2) orrect (1) r fewer correct (0)		
		Sm	ooth line graph(1)		[4]
	(c)	(i)	point at 2 min/3 <sup>rd</sup> point/48 cm <sup>3</sup> (1)		
			off curve (1)		[2]
		(ii)	reading from graph, 62–64 (cm³)(1)		
			indication (1)		[2]
	(d)	cur	ve to left of original (1)		
		to s	same level (1)		[2]

		9	
3	(a)	electrolysis (1)	[1]
	(b)	aluminium would react/platinum is inert/less reactive (1)	[1]
	(c)	(i) chlorine (1)	
		(ii) colourless/bleached/pale yellow (1)	[2]
4	(d)	Table of results	
		total volume of water boxes completed correctly (1),	
		10, 12, 14, 18	
		temperature boxes completed (2) all 4 correct (2) 3 correct (1) 2 or fewer correct (0)	
		91, 73, 65, 54	[3]
	(e)	appropriate scale for y axis (1) <b>note:</b> must use at least 4 large squares vertically to plot points	
		all points correctly plotted (3), all 4 correct (3) 3 correct (2) 2 correct (1) 1 or fewer correct (0) note: origin should not be included	
		smooth line graph (1)	[5]
	(f)	value from graph for $20\text{cm}^3$ water, $5053$ (1) $\pm$ half a small square	
		shown clearly by extrapolation (1)	
		unit, °C (1)	[3]

Mark Scheme Cambridge IGCSE – March 2015

Syllabus 0620 Paper 62

age 4	Mark Scheme	Syllabus	Paper
	Cambridge IGCSE – March 2015	0620	62
(g)	clear/colourless liquid forms/no solid/crystals/salt visible (1)		[1]
(h)	salt would not all dissolve (1)		
	use of figures (1) e.g. only 5.7g would dissolve in 10 cm <sup>3</sup> water at 100 °C		[2]
(i)	sketch graph always above line (1)		
	label (1)		[2]
(j)	any <b>one</b> improvement from: (1)		
	do not remove thermometer from solution use IT method/second person to note formation of crystals repeat do separate experiments use smaller volumes of water evaporation		
	linked explanation (1)		
	loss of solid on thermometer observing formation of first crystals may vary average more results to plot on graph method of avoiding evaporation e.g. separate experiments, lid		[2]
tests	s on solution <b>E</b>		
(a)	yellow/green/any combination of yellow/green		[1]
(b)	white precipitate (1)		[1]
(c)	(i) green (1) precipitate (1)		[2]
	(ii) indicator paper turns blue (1)		
	pungent/sharp smell(1)		[2]

Pa	ige 5	Mark Scheme	Syllabus	Paper
		Cambridge IGCSE – March 2015	0620	62
	(d) <u>k</u>	<u>prown</u> precipitate (1)		[1]
	(g) h	nydrogen (1)		[1]
		any <b>two</b> from: ransition metal (1)		
	C	lifferent valencies / colours (1)		
	a	acidic solution (1)		[2]
6	any <b>s</b>	seven from:		
	extra	ction		
	cut le	eaves up/small pieces/grind/crush (1)		
	use c	of pestle/mortar (1)		
	add v	vater (1)		
	sand	(1)		
	boil/l	neat/stir/mix/shake (1)		
	sepa	ration		
	deca	nt/filter (1)		
	obtai	ning crystals		
	evap	orate/heat solution (1)		
	to cry	estallising point/until crystals start to form (1)		
	leave	to cool (1)		[7]
