## MARK SCHEME for the October/November 2014 series

## 9707 BUSINESS STUDIES

9707/12

Paper 1 (Short Answer/Essay), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2014 series for most Cambridge IGCSE<sup>®</sup>, Cambridge International A and AS Level components and some Cambridge O Level components.

® IGCSE is the registered trademark of Cambridge International Examinations.

Page 2	Mark Scheme	Syllabus	Paper
	Cambridge International AS/A Level – October/November 2014	9707	12

(a) 1. Retained profit is profit after payment of taxation and dividends to shareholders.

**2.** It becomes a source of finance for future activity, ploughed back/invested in the business e.g. a significant source of funds for expansion.

Partial definition	(ONE of these points)	[1]
Full definition	(Both points)	[2]

(b) Financial Accounting is concerned with preparing published accounts of a business in line with legal requirements, such as Income Statement/Profit & Loss. These relate to business performance and profitability. They are a record of past performance, not dealing with future predictions and are useful to **external** stakeholders.

Management accounting is concerned with preparing information for managers – this financial information is used for forward planning, reviewing and analysing current business performance – **internal** use only.

Limited distinction made or a partial explanation of <b>one</b> concept.	[1]
Sound explanation of <b>one</b> concept or a partial explanation of <b>two</b> concepts.	[2]
Sound explanation of both concepts.	[3]

**2** (a) Diseconomies of scale are when factors cause:

1

- costs of production to rise and when
- the scale of operations is increased.

Partial definition	(ONE of these given)	[1]
Full definition	(BOTH of these given)	[2]

(b) Diseconomies of scale are generally related to management challenges/problems associated with directing a large organisation, often with many divisions and spread across countries.

Communication is often a major problem leading to diseconomies – excessive use of nonpersonal communication – mass of messages – long chains of command – messages distorted – information is delayed – poor decision-making – lack of feedback – management efficiency reduced.

Impersonal organisations – lose contact with employees – demotivation – danger of staff alienation, especially in flow line manufacturing companies (use team work and job enrichment to address these issues).

Poor co-ordination – with growth – difficult often to maintain control over the disparate parts of the organisation – purpose and mission not understood – duplication of effort – bureaucracy – this poor co-ordination can lead to higher production costs. Top heavy companies – company politics.

		Partial definition	(ONE of these given)			[1]
		Full definition	(BOTH of these given)			[2]

(b) Most importantly, an effective workforce plan helps a business achieve its corporate objectives as it ensures that the business has a right sized workforce with the right skills at the right time.

Good workforce planning can be a source of competitive advantage.

Workforce planning encourages managers to prepare and plan for change, rather than just react.

It places the H.R.M. department at the heart of strategic decision-making. Businesses going through significant change (technological/environmental) are better able to handle worker issues.

Talent/skill shortages are identified.

Supports internal communication in organisations in times of issues and opportunities. Prepares organisations for change, such as restructuring, reducing or enlarging the workforce.

•	Limited attempt to identify benefits, or a partial explanation of <b>one</b> benefit, or a list of <b>two</b> .	[1]
•	Sound explanation of <b>one</b> benefit, or partial explanation of <b>two</b> benefits.	[2]

[3]

- Sound explanation of **two** benefits.
- 5 (a) As a business activity, marketing has important links with other functional departments, e.g. finance and H.R.M.

In order to achieve marketing objectives such as increased sales and profits, a marketing department will have a significant influence on the work of other departments.

Market research data may have a key role in new product development and sales forecasts will impact on operations department as it plans for capacity and inventory levels.

H.R. departments will have to ensure appropriate levels of staff are in post in production and sales to meet the marketing forecasts.

Finance departments will need to support a planned marketing budget and use marketing data to devise operational budgets and cash flow forecasts.

Analysis of inter-departmental relationships with a marketing department	[7–8]
Good explanation of inter-departmental relationships with a marketing department.	[5–6]
Limited explanation of inter-departmental relationships with a marketing department.	[3–4]
Little understanding of inter-departmental relationships.	[1–2]

Little understanding of inter-departmental relationships.

- (b) For smaller businesses mass marketing is not an option – too expensive.
  - The best niche marketing is based on designing goods or services specifically tailored to the needs of particular customers.
  - Lower initial costs, especially for advertising.
  - Focus on company strengths and their niche targeted activity.
  - Competition may ignore the niche too small or unaware.
  - Businesses can develop expert knowledge in the niche giving a real advantage over potential customers.
  - However, market niches can disappear as a result of changes in economic conditions, fashion, or taste.
  - Mass market businesses may target the niche if it grows in value or size small firms may find the competition too strong.
  - Niche marketing vulnerable to big and/or frequent swings in consumer spending.
  - Economies of scale are limited.

Page 5	Mark Scheme	Syllabus	Paper
	Cambridge International AS/A Level – October/November 2014	9707	12

Evaluative comment on the advantages and disadvantages of niche marketing in context (a small fashion clothes manufacturer). [9–12]

Analysis of the advantages and disadvantages of niche marketing in context (a small fashion clothes manufacturer). [7–8]

Discussion of the advantages and or disadvantages of niche marketing.	[3–6]
---	-------

[1–2]

Limited understanding of niche marketing.

- 6 Accounting ratios (such as profitability and liquidity ratios) assist managers to analyse the current financial position of a business.
  - Ratios simplify understanding of financial statements and identify changes in the financial condition of a business.
  - Ratios facilitate inter-business comparisons. Ratios highlight the factors associated with successful and unsuccessful businesses.
  - Ratios assist in financial planning, forecasting, and control basic management functions.
  - Ratios indicate level of suggested management efficiency if resources are being employed efficiently, if sales revenue is being converted into net profit, if the company is managing working capital effectively.
  - However, accounting ratios have limitations even though they are simple to calculate and easy to understand.
  - Financial statements (from which ratios are calculated) may be affected by accounting conventions and concepts.
  - Forecasts based on ratio analysis may be substantially affected by factors such as market conditions and management policies.
  - Non-financial issues/charges not reflected in the ratios may be more important than financial indicators.
  - Competitor companies may use different accounting principles and procedures so making comparison difficult.

Evaluative discussion of the value of both accounting ratios for senior managers.	[17–20]
Analysis of the value of both accounting ratios for senior managers.	[13–16]
Good understanding of both profitability and liquidity ratios.	[11–12]
Some understanding of profitability and or liquidity ratios.	[5–10]
Very limited understanding of accounting ratios.	[1–4]

	<ul> <li>A business with mainly social objectives that reinvests profits into brather than maximising returns to owners.</li> <li>Have distinctive aims and objectives – while sharing some character of organisation – they rely on the market and sales for income – bur of social mission and have social ownership structures.</li> <li>They seek to use business solutions to achieve public good – and range of areas, e.g. health and social care, transport, childcare in U.</li> <li>So they have social and business aims (often referred to as "doubl some add environmental aims and are referred to as "triple bottom.</li> <li>They have social objectives – profit to reinvest.</li> <li>They have social objectives – provide jobs and support communities disadvantaged sections of communities.</li> </ul>	eristics of ot at they have operate in a J.K. e bottom lin line".	her types a sense wide
	-		
	They often have environmental objectives – to manage the business in sustainable way.	an environr	nentally
	Analysis of the distinctiveness of social enterprise organisation aims.		[7–8
	Good explanation of the distinctive aims of social enterprises.		[5–6
	Limited explanation of the distinctive aims of social enterprises.		[3—4
	Little understanding of social enterprise organisations.		[1–2
(b)	businesses making things happen – business opportunities are ide risks are taken.	entified and o	calculated
	<ul> <li>Those who take risks and show enterprise called entrepreneurs – t contribution to the development of business enterprise in a country add value, create jobs – make profits – contribute to social investment</li> </ul>	v – seize initi	iatives –

- Business enterprise(s) considered to be important in that:
- Jobs are created.
- Economic growth increased living standards tax revenues for governments to spend on infrastructure.
- Businesses grow, expand, diversify and support a more developed economy.
- Adds dynamism to an economy increased use of I.T. and new technology.
- Helps improve international competitiveness exports.
- Helps achieve social cohesion in a country and supply important social goods.
- Economic development comes from economic growth which is significantly supported by business enterprise – countries become industrialised and modernised through sustained business enterprise activity.

Evaluative comment on the importance of business enterprise(s) to the development of a country (in context). [9–12]

Analysis of the importance of business(s) enterprise to the development of a country (in context). [7–8]

Discussion of the importance of business enterprise(s) to the development of a country. [3-6]

[1–2]

Limited understanding of business enterprise(s).
