MARK SCHEME for the October/November 2006 question paper

9700 BIOLOGY

9700/03

Paper 3 (Practical 1), maximum raw mark 25

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

The grade thresholds for various grades are published in the report on the examination for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2006 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Page 2	Mark Scheme	Syllabus	Paper
	GCE A/AS LEVEL - OCT/NOV 2006	9700	3

Qn	G	Expected Answers	Marks	Additional Guidance
1 a		K3 freshest;	1	
		K5 driest;	1	
			I	
1 b		Clear single lines;	1	
		Stoma / stomata present;	1	
		Guard cells labelled;	1	
			I	
		Less stoma;	1	
		Cells drawn to same scale;	1	
1 c		Correct reference to relative number of stomata on		
10		each side of the leaf;		
		Transpiration / water loss through stoma;		
		Jelly stops transpiration;		
		correct reference to transpiration through upper	3 may	
			JIIIdA	
1 d		Five from:		
		Method		
		Dise of polometer / weighing plant / leary shoot in narrow measuring cylinder:		
		Some explanation of setting up:		
		Obtaining result		
		loss in mass / fall in water level		
		Constant wind speed;		
		Fan distance; change wind speed:		
		Control 2 other variables:		
		Replication;	5 max	
		Total	17	
2 a		Size between 16mm and 20mm / 220;	1	16mm 0.073 mm
		answer correct;	1	17mm 0.077 mm
2 b		Two from:		19mm 0.086 mm
		Are different;		20mm 0.091 mm
		Sectioned at different levels;		
		Orientation i.e. oval longitudinal section appears		
		longer;	2 may	
			2 1110	
2 c		Two from:		
		Open at bottom / leading to tube;		
		Continuous epitnelium;		
		Wider than alveoli / larger space:		
		No or fewer RBC (in epithelium);	2 max	
2 d		Two from:		
2 0		Red blood cells:		
		Absence of (epithelial) nuclei;		
		Idea of thin walls;	2 max	
		Total	8	
		Paper	25
