## MARK SCHEME for the October/November 2010 question paper for the guidance of teachers

## 9701 CHEMISTRY

9701/33
Paper 3 (Advanced Practical Skills), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

|  | GCE A/AS LEVEL - October/November 2010 | 9701 | 33 |

| (b) | ACE Interpretation | Calculates the mean, correct to 2 decimal places (third decimal place maybe rounded to the nearest $0.05 \mathrm{~cm}^{3}$ ) from any accurate titres within $0.20 \mathrm{~cm}^{3}$. A mean of exactly .x25 or .x75 is allowed but the candidate may round up or down to the nearest 0.05 $\mathrm{cm}^{3}$. <br> If ALL burette readings are given to 1 decimal place then the mean can be given to 1 decimal place if numerically correct without rounding. <br> Mean of 24.3 and $24.4=24.35(\checkmark)$ <br> Mean of 24.3 and $24.4=24.4(x)$ <br> Mean of 24.3 and $24.5=24.4$ ( $)$ <br> Titres to be used in calculating the mean must be clearly shown - in an expression or ticked in the titration table. | 1 | [1] |
| :---: | :---: | :---: | :---: | :---: |
| (c) | ACE Interpretation | No additional factor/expression is allowed in any step <br> If an answer, with no working, is given in any section allow if correct. <br> I Uses ${ }^{15.0} \mathrm{I}_{248.2}$ only in step (i) If no working shown accept only the following evaluated answers: (0.060, 0.0604 or 0.06044 ) | 1 |  |
|  |  | II Uses answer (i) $\times$ cand average titre $/ 1000$ in step (ii) and answer (iv) $\times 1000 / 25$ in step (v) | 1 1 |  |
|  |  | III Uses answer (ii) $\times 1 / 2$ in step (iii), and answer (iii) $\times 2$ in step (iv) | 1 |  |
|  | PDO Display | IV Appropriate working shown in a minimum of three sections. <br> To include equations as steps for the working mark; <br> In (iii) must see $\mathbf{x 2}$ or $\mathbf{x 0 . 5}$. <br> In (iv) must see multiplication or division by 6, $\mathbf{1 . 2}$ or 2. $\begin{array}{ll} 1: 6 & \text { for } 1 \mathrm{O}_{3}^{-} / 6 \mathrm{H}^{+}, \\ 1: 1.2 & \text { for } 5 I^{-} / 6 \mathrm{H}^{+}, \\ 1: 2 & \text { for } 6 \mathrm{H}^{+} / 3 \mathrm{I}_{2} \end{array}$ | 1 |  |
|  |  | V 3 to 5 significant figures in final answers to all sections attempted - minimum of three final answers required to qualify for the award of this mark. | 1 | [5] |

PDO Layout \\
PDO Recording \\
MMO Decisions \\
MMO Quality
\end{tabular} \& II \& \begin{tabular}{l}
Records at least four different balance readings and at least one mass of solid/gas \\
Accept \(0.0(0 X) g\) as the mass of the empty tube or a statement that the tube is tared. \\
Gives all appropriate headings and units when recording results. \\
Do not accept mass of empty tube as \(0.0(00) \mathrm{g}\) here unless tube is described as tared. \\
(minimum of three pieces of information) \\
All recorded balance readings consistent to at least 1 decimal place. \\
(minimum of three balance readings) \\
Evidence of reheating to "constant" mass. For balances reading to 1 d.p. two masses must be identical \\
For 2 or 3 d.p.balances, two masses must be within 0.05 g \\
d VI \\
Check and correct \\
all subtractions in the results table. \\
Calculate \({ }^{\text {mass heated } / \text { mass of residue to }}\) 3 significant figures. \\
Compare to Supervisor standard or standard value of 1.45. \\
 \\
Award \(\underline{\mathbf{V}}\) only for a difference of \(0.15+\) to 0.30 \\
Where a candidate repeats the experiment use cumulative masses of FA 3 and residue. \\
Where masses of FA 3 and residue cannot be checked, accept candidate values to calculate the ratio.

| (i) | addition <br> of NaOH | white ppt | white ppt | white ppt | white ppt |
|  | further <br> addition <br> of NaOH | ppt soluble | ppt soluble | ppt soluble | ppt insoluble |
| (ii) | addition <br> of $\mathrm{NH}_{3}$ | white ppt | white ppt | white ppt | white ppt |
|  | further addition of $\mathrm{NH}_{3}$ | ppt insoluble | ppt soluble | ppt insoluble | ppt insoluble |
| (iii) | addition <br> of KI | no ppt, no reaction, colourless or yellow solution | no ppt, no reaction, colourless or yellow solution | yellow ppt | no ppt, no reaction, colourless or yellow solution |

Minimum evidence required in observations for the ion identity marks I, II and III in (b)
In some cases, identification may be allowed from incomplete observations. There must, however, be no observations that are contrary to those expected with any "correctly" identified ion.

The same criteria will be applied to "candidate's supporting evidence in awarding mark IV. Candidates are not permitted to introduce (from the Qualitative Analysis Notes) supporting evidence that is not given in the observations. Precipitate colour need not be mentioned in supporting evidence.

| $\mathrm{Al}^{3+}$ | (white) precipitate, soluble in (excess) NaOH , if yellow ppt with KI |
| :--- | :--- |
| $\mathrm{Zn}^{2+}$ | (white) precipitate, soluble in (excess) $\mathrm{NH}_{3}(\mathrm{aq})$ |
| $\mathrm{Pb}^{2+}$ | Yellow precipitate with KI |
| $\mathrm{Mg}^{2+}$ | (white) precipitate, insoluble in (excess) NaOH |
