UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

GCE Advanced Subsidiary Level and GCE Advanced Level

MARK SCHEME for the October/November 2010 question paper for the guidance of teachers

9702 PHYSICS

9702/23

Paper 2 (AS Structured Questions), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	Page 2	Mark Scheme: Teachers' version	Syllabus	Paper							
		GCE A LEVEL – October/November 2010	9702	23							
1	(a) allow 0.	(a) allow 0.05 mm → 0.15 mm									
	(b) allow 0.	(b) allow 0.25 s → 0.5 s									
	(c) allow 8	(c) allow 8 N → 12 N									
	ignore r	ignore number of significant figures									
2	crystalline:	atoms / ions / particles in a regular arrangement / lattice long range order / orderly pattern (lattice) repeats itself (1) long chain molecules / chains of monomers some cross-linking between chains / tangled chains (1) disordered arrangement of molecules / atoms / particles any ordering is short-range (1)	(1)	B1 B1							
	amorphous:		es (1)	B1							
	(three 'B' m	arks plus any other 2 marks)	(' /	B2	[5]						
3	adjust c.r.o. measure ler frequency =	prophone / (terminals of) loudspeaker to Y-plates of c.r.d to produce steady wave of 1 (or 2) cycles / wavelength and note time-base $b = 1 / \lambda b$ is measured as s cm ⁻¹ , unless otherwise stated)		B1 B1 M1 A1	[4]						
	(if statement is 'measure T , $f = 1/T$ then last two marks are lost)										
4	(a) accepta	able straight line drawn (touching every point)		B1	[1]						
	(b) the dist d is the		C1 A1	[2]							
	('d is no										
	. , . ,	meter: allow 1.5 ± 0.5 cm (accept one SF) ecf from (a)		A1	[1]						
	gra	dient = 4.76, \pm 0.1 with evidence that origin has not beed dient = g / 2 9.5 m s ⁻²	en used	C1 C1 A1	[3]
