# MARK SCHEME for the May/June 2011 question paper

## for the guidance of teachers

# 0460 GEOGRAPHY

0460/42

Paper 4 (Alternative to Coursework), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	Page 2		Mark Scheme: Teachers' version	Syllabus	Paper
			IGCSE – May/June 2011	0460	42
1	Sha Lar	allow ge lea	on leaves to remove heavy rainfall $(1 - 3^{rd})^{rd}$ roots to extract soil nutrients $(2 - 1^{st})^{st}$ aves to allow more transpiration $(3 - 4^{th})^{st}$ at Buttress roots to make the trees more stable h	row) row)	done;[3 @ 1 = 3]
	(b) (i)	To g To a To h	<u>mples</u> ive fair results / identify anomaly (1) void bias / be objective (1) ave a wider range / variety / wider selection (1) <u>To reflect reality / Better results</u> without qualification	<u>n</u>	[1]
	(ii)	5 sit Easi Easi	<u>mples</u> es along transect is systematic (1) er to select sites on a straight line (1) er to locate 5 sites at equal intervals on straight line sistent way of studying 3 areas and comparing then		[2 @ 1 = 2]
	(c) (i)	Tube Mea Time grou	<u>mples</u> e / bottomless measuring cylinder pushed / knocked sured amount / 1 litre of water poured into cylinder e or use stopwatch until water infiltrates / sinks ind (1) <u>T: Dig hole in ground –</u> must refer to cylinder going ir	(1) / disappears / c	Irains into [3 @ 1 = 3]
	(ii)	Area	a C		[1]
	(iii)	Site	3 and Area C – <u>need both for the mark.</u>		[1]
	(iv)	<u>25+3</u>	<u>35+21+48+52</u> OR 181 / 5 (1) = 36.2 (1) 5		

1 mark for knowing how to calculate it; 1 mark for the correct answer as here. [2 @ 1 = 2]

Page 3	Mark Scheme: Teachers' version	Syllabus	Paper
	IGCSE – May/June 2011	0460	42

(d) (i) Two points plotted at 50 and 44 on Fig. 3 Area A (1) joined up by straight lines from 3–5 (1)
 Plot and shade bar correctly at 3 on Fig. 3 Area B (1)
 Two divided bar graphs completed at 80 / 20 and 57 / 43 on Area C (1) and shaded correctly (1) NO MARKS IF PLOTTED WRONG WAY UP [5 @ 1 = 5]

(ii)

#### High infiltration rate = short infiltration time = high veg. cover = low bare ground Low infiltration rate = long infiltration time = low veg. cover = high bare ground

Hypothesis is false / disagree - (1). If say true / partially true then no marks at all.

Second mark if write new hypothesis e.g. "more types of vegetation where water infiltrates more quickly". (1)

Evidence can only be for comparative statement from Area C and / or Area A: At C shortest infiltration time and most types of vegetation (1) 30 secs or less / 18 types (1)

At A longest infiltration time and least types of vegetation (1) 36 secs or more / 11 types (1)

Allow a Data mark max. 1 but not compulsory. NO CREDIT FOR DATA FROM INDIVIDUAL SITES. [1 HA + 2 = 3]

(iii) <u>No hypothesis mark here.</u> <u>Reserve use of data for 2 marks max.</u> Shortest infiltration time in area C (all < 30secs / avg 24.6 / range 20 / 30 secs) where highest %age of vegetation cover (57–80% / avg 68.45%) OR

Longest infiltration time in area A (all > 36secs / 36–58 range) where lowest %age of vegetation cover (8–38% / 24.2% avg).

DO NOT DOUBLE CREDIT OPPOSITE STATEMENTS OR REFS TO GROUND COVER %AGES OR REFS TO DATA FROM INDIVIDUAL SITES [1 + 2D = 3]

 (iv) Water infiltrates quickly where vegetation greater due to: <u>Examples</u>
 \*soil being broken up by vegetation roots (1)
 \*soil not compacted / loose / has gaps / cracks (1)
 \*quicker absorption by vegetation so promotes more growth / roots absorb
 water (1)
 NOT *Ground is hard* without gualification
 [2 @ 1 = 2]

Page 4	Mark Scheme: Teachers' version	Syllabus	Paper
	IGCSE – May/June 2011	0460	42

(e) One separate reason required for A B and C with 1 floating mark. Mark for consequence not for cause. 1 MAX if general consequences with no Area ref. No need to refer to effect on infiltration time.

Examples:

Area A is popular with tourists so compacted soil (1) vegetation eroded (1) Parking / roads / footpaths cause impermeable surfaces (1) compacted soil (1)

Area B has been deforested so less ground cover (1) Dirt road may create less vegetation (1) compacted soil (1) Area B shows contrasts between sites with and without vegetation cover (1) In areas with little vegetation cover sun will harden the ground (1)

Area C is natural forest with lots of vegetation types (1) no trampling of vegetation (1) less compacted soil (1) 1A + 1B + 1C + 1 = [4 @ 1 = 4]

## [Total: 30]

[1]

## 2 (a) (i) Examples

Will not get a distance as an answer / too vague / generic (1) Too intrusive for people to answer / privacy issues / security / embarrassing (1) Students may not know the town / village (1) Information not appropriate as shoppers may be there for work / tourism so where they live irrelevant (1) Information not needed / irrelevant for hypothesis / may be too much (1) [2 @ 1= 2]

- (ii) Sampling with an even / regular / equal distributions (1)
   e.g. asking every 10<sup>th</sup> person to answer questionnaire (1)
   <u>NOT Orderly or In a sequence</u>.
- (iii) <u>Examples</u>
   Fair method of deciding who to interview (1)
   Removes possible bias of who is interviewed / student influence / choice
   removed (1)
   <u>NOT easy / quick / simple / accurate</u>.
   [1]
- (iv) <u>No credit for yes / no only for two reasons for choice. Can give 1 Yes and 1 No if</u> not opposites. NO CREDIT FOR *Physical effects on students e.g. tiring.*

<u>YES:</u> enough people to be a fair sample (1) to get variety of age / gender (1) doable in the time (1) <u>NO:</u> maybe not enough for a fair sample (1) may miss some age / gender info (1) Because should vary numbers interviewed at each centre (1) [2 @ 1 = 2]
