## **CAMBRIDGE INTERNATIONAL EXAMINATIONS**

**International General Certificate of Secondary Education** 

## MARK SCHEME for the October/November 2013 series

## 0610 BIOLOGY

0610/63

Paper 6 (Alternative to Practical), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

	IGCSE – October/November 2013	0610	63

## Mark schemes will use these abbreviations:

; separates marking points

/ alternatives

R reject

A accept (for answers correctly cued by the question)

ignore as irrelevantecferror carried forward

**AW** alternative wording (where responses vary more than usual)

**AVP** alternative valid point

<u>underline</u> actual word given must be used by candidate (grammatical variants excepted)

() the word / phrase in brackets is not required but sets the context

D, L, T, Q quality of: drawing / labelling / table / detail as indicated

max indicates the maximum number of marks

Question	Answer	Marks	Guidance for Examiners
1 (a) (i)	drawing: <b>O</b> – outline;		clear, unbroken lines with no shading
	S - size;		larger than original
	<b>D</b> – detail;		
	<ul> <li>L – label;         one label from: seed(s) / (remains of) stigma or         style / stem or stalk or pedicel / succulent part or         flesh or cortex</li> </ul>	[4]	label line must end on structure, even if unambiguous
(ii)	length of X – X of Fig.1.1;		<b>A</b> . 87–90 mm
	equivalent length X – X of drawing;		
	formula; length X – X on drawing ÷ length X – X on Fig.1.1.		mark is independent of other marking points
	answer;	[4]	
(b) (i)	skin / seed(s) / stalk or stem / both have flesh AW / smooth surface / skin;	[1]	

Page 4	Mark Scheme	Syllabus	Paper
	IGCSE – October/November 2013	0610	63

(ii)	difference	apple	plum		any three differences in one box or row could gain 3 marks, but inconsistencies negate
	stem	un-branched straight smooth AW	branched; crooked; uneven surface; AW		features must be visible, not inferred  no mark for naming the feature, but must be clearly stated
	seeds	darker 2 visible / 1+ at two sides smaller AW	lighter one; central; larger; AW		
	fleshy part	thick(er) light / white	thin(er); dark;		
	size of whole fruit	larger / larger SA unequal halves basal indentation	smaller/smaller SA; symmetrical; absent;	[max. 3]	
(c)	safety feature;				
	Benedict's solution;				A fehling's / copper sulphate + sodium hydroxide or potassium hydroxide A clinistix
	heat / boil / 70 °	°C+ cited;			I warm
	colour change	blue / turquoise to gre	en / yellow / orange / red ;	[4]	initial colour must be given
				[Total: 16]	

Page 5	Mark Scheme	Syllabus	Paper
	IGCSE – October/November 2013	0610	63

2 (a)	A – axes I	abel +	even sca	ale;			
	<b>S</b> – size;						spacing of numerical values used in plots to fill half the grid or more in both directions
	P – plot:				1		
		time / s					
		рН	40 °C	50 °C			
		5.5	600	850			
		6.0	360	500			
		7.0	50	70			
		7.5	35	65			
		8.0	45	100			
	L – line;				•		ruler drawn point to point / smooth curve
	<b>K</b> – key;					[5]	
(b) (i)	describe: increased rate / decreased time as pH increases (5.5–7.5);				s pH increases (5.5–7.5);		
	pH 7.5 identified as optimum / most rapid / least time taken;						
	decreased rate / increased time as pH increases (7.5 to 8.0);				as pH increases (7.5 to 8.0);		
	explain: (enzyme activity changes because) enzyme is denatured / shape of active site is altered AW;				e) enzyme is denatured /	[4]	

Page 6	Mark Scheme	Syllabus	Paper
	IGCSE – October/November 2013	0610	63

(ii)	describe:		
	takes more time / slower at 50°C / ORA for 40°C;		
	difference more marked at pH 5.5 and pH 8.0 AW;		
	similar shape to curves / AW;		
	data comparison;	[max. 2]	
(c) (i)	to come to same temperature / equilibrate;	[1]	
(ii)	mark 'X' or similar mark on underside / waterproof mark / AW;		
	hold against dark background / AW		
	comparison with distilled water and undigested milk or with end point / AW;		
	shine a light through / use of a meter;	[max. 1]	
(d) (i)	at least three other temperatures in addition to 40°C + 50°C;	[1]	
(ii)	pH;		any three from any line
	trypsin: conc; volume / amount; type;		
	milk: conc; volume / amount; substrate;	max [2]	
(iii)	time to clear / AW;	[1]	
(iv)	water / boiled enzyme / inactive enzyme;	[1]	
		[Total: 18]	

Page 7	Mark Scheme	Syllabus	Paper
	IGCSE – October/November 2013	0610	63

3	(a)	carbon dioxide – 0.04% / lower and 4.0% / higher;		
		water – varies due to humidity of surroundings / AW and more / saturated;	[2]	
	(b) (i)	test – limewater ;		
		results – clear / colourless / transparent to cloudy;	[2]	<b>A</b> . hydrogen carbonate solution – red to yellow. initial colour must be given
	(ii)	test – (anhydrous) copper sulphate / cobalt chloride;		
		results – white to blue for copper sulphate blue to pink for cobalt chloride;	[2]	
			[Total: 6]
