## **CAMBRIDGE INTERNATIONAL EXAMINATIONS**

**International General Certificate of Secondary Education** 

## MARK SCHEME for the October/November 2013 series

## 0610 BIOLOGY

0610/51

Paper 5 (Practical Test), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

## Mark schemes will use these abbreviations

- ; separates marking points
- / alternatives
- R reject
- A accept (for answers correctly cued by the question)
- I ignore as irrelevant
- ecf error carried forward
- **AW** alternative wording (where responses vary more than usual)
- AVP alternative valid point
- <u>Underline</u> actual word given must be used by candidate (grammatical variants excepted)
- () the word / phrase in brackets is not required but sets the context
- D, L, T, Q quality of: drawing / labelling / table / detail as indicated
- max indicates the maximum number of marks.

Question		An	swer		Mark	Guidance for Examiners
1 (a)	shape of seed	round / circular / disc-like / biconvex / flat and round AW	chickpea round / circular / spherical / irregular / pointed / tear shaped AW	soya bean elongate / oval AW		Any two boxes correctly completed = 1 mark  Ignore colour / size
	appearance of seed coat	varied / speckled / patterned	uneven / ridged / rough transparent	even / smooth / uniform / transparent	[3]	
(b) (i)	Protein test					A other correct tests e.g. Xanthoproteic – yellow to orange Millons – flesh to reddish brown use of albustix – Yellow to green
	add biuret solu biuret A ar biuret 1 an copper sul	nd B / nd 2 /	assium / sodiur	n hydroxide;		A correct chemical symbols Ignore Copper sulphate or potassium hydroxide / sodium alone.
	blue to purple	/ mauve / lilac	AW;		[2]	R if heated / boil
(ii)	Fat test					Max [2] if describe grease spot test.
	add alcohol / e pour / add to w white / cloudy /	ater;	med / AW;		[3]

(c)	carry out starch test  observation – (changes from brown / orange) to blue / purple / black;		If soya bean is not black / darker – max [1] as not left long enough.
	conclusion – starch is present;	[2]	Chough.
(d) (i)	Plotting bar chart		A vertical or horizontal bars. Line graph – max 3 – A, S and K
	A – label axes and even scale;		x-axis: names of beans y-axis: %.
	S – plots to fill half or more on both axes;		Do not award if columns exceed printed grid.
	P – plot;		If no scale or no seeds labelled, P = 0. Accurate to +/- 0.5 of grid square. P no more than 2 errors
	C – columns do not touch;		A protein and fat columns touching if space between different seed columns.
	<b>K</b> – key or label (protein / fat );	[5]	
(ii)	soya (bean);	[1]

	(e)	measure :- starting and final temperature / change in temperature;		
		control: mass of sample / volume of water;		A weight / amount, of sample / amount of water
		one safety measure; e.g. fume cupboard / tongs AW / lab coat / goggles / correct ref. to hair / ties	[3]	Ignore gloves
			[Total: 27]	
2	(a)	drawing of shape;		Max [1] if shape is shown without a green layer drawn and labelled.
		position and label green outer layer;	[2]	labelled.
	(b)	drawing of shape in E – more curved;		Compare with the shapes in (a) Table 2.1.
		draw and label green outer layer;		
		drawing of shape in W – more straight;		If W shows a straighter shape allow.
		draw and label green outer layer	[4]	
	(c)	three from		
		solution E strong(er) / (more) concentrated / less water / lower water potential / AW;		
		water moved by osmosis;		
		no water movement in, outer / dark green tissue OR water moves out of, inner / light green tissue;		
		inner / pale green, cells flaccid / plasmolysed;	[max 3]	A tissue

	IGCSE – October/November 2013	0610	51

(d)	Any two from:- Source of error: e.g. slice cut too thick / cut unevenly / pieces not submerged with liquid AW / pieces placed in solutions at different times / only one piece tested in each solution / kept in different temperatures;		Ignore range of solutions
	Any two from:- Improvement; e.g. use of sharper cutting tool AW / cut halves accurately / both pieces must be submerged / pieces placed in solutions at same time / repeat / keep at same temperature;	[4]	Improvement must be linked to source of error.
		[Total: 9]	
3 (a) (i)	Two similar visible features from : tentacles; foot; unsegmented body / no segments;	[max 2]	Ignore sense organs / eyes Ignore antennae / anthers  Ignore shape of body Ignore slimy / mucus / soft Ignore no legs
(ii)	One difference: Shell;	[1]	A darker A different number tentacles A shiny

Page 7	Mark Scheme	Syllabus	Paper
	IGCSE – October/November 2013	0610	51

		[Total: 4]	
(ii)	protection / prevent desiccation / camouflage;	[1]	
	L – one label;	[4]	Label can vary as to type of shell provided.  Ignore Shell
	<b>D</b> – detail – lip of shell / feature of shell;		
	S – size;		minimum – 6 cm
	O – outline;		Clear unbroken line and no shading;
(b) (i)	Drawing of mollusc shell – gastropod		See Supervisor's report.
