0	Candidates answer on the Question Paper.		
	Additional Mate	erials: Electronic calculator	

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a pencil for any diagrams or graphs.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Answer all the questions.

Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place in the case of angles in degrees, unless a different level of accuracy is specified in the question. The use of an electronic calculator is expected, where appropriate. You are reminded of the need for clear presentation in your answers.

At the end of the examination, fasten all your work securely together. The number of marks is given in brackets [] at the end of each question or part question. The total number of marks for this paper is 80.

This document consists of 17 printed pages and 3 blank pages.

Mathematical Formulae

1. ALGEBRA

Quadratic Equation

For the equation $ax^2 + bx + c = 0$,

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a} \; .$$

Binomial Theorem

$$(a+b)^n = a^n + \binom{n}{1}a^{n-1}b + \binom{n}{2}a^{n-2}b^2 + \dots + \binom{n}{r}a^{n-r}b^r + \dots + b^n,$$

where *n* is a positive integer and $\binom{n}{r} = \frac{n!}{(n-r)!r!}$.

2. TRIGONOMETRY

Identities

$$\sin^2 A + \cos^2 A = 1$$
$$\sec^2 A = 1 + \tan^2 A$$
$$\csc^2 A = 1 + \cot^2 A$$

Formulae for $\triangle ABC$

$$\frac{a}{\sin A} = \frac{b}{\sin B} = \frac{c}{\sin C}$$
$$a^2 = b^2 + c^2 - 2bc \cos A$$
$$\Delta = \frac{1}{2} bc \sin A$$

1

The Venn diagram shows the universal set \mathscr{C} , the set *A* and the set *B*. Given that n(B) = 5, n(A') = 10 and $n(\mathscr{C}) = 26$, find

(ii) n(*A*),

(iii) $n(B' \cap A)$.

[1]

[1]

For

Examiner's Use

[1]

A 4-digit number is to be formed from the digits 1, 2, 5, 7, 8 and 9. Each digit may only be used once. Find the number of different 4-digit numbers that can be formed if

 (i) there are no restrictions,
 [1]

(ii) the 4-digit numbers are divisible by 5,

(iii) the 4-digit numbers are divisible by 5 and are greater than 7000.

[2]

3 Show that $(1 - \cos \theta - \sin \theta)^2 - 2(1 - \sin \theta)(1 - \cos \theta) = 0.$

4 Find the set of values of k for which the curve $y = 2x^2 + kx + 2k - 6$ lies above the x-axis for all values of x. [4]

For Examiner's Use 5 The line 3x + 4y = 15 cuts the curve 2xy = 9 at the points *A* and *B*. Find the length of the line *AB*. [6]

For Examiner's Use 6 The normal to the curve $y + 2 = 3 \tan x$, at the point on the curve where $x = \frac{3\pi}{4}$, cuts the *y*-axis at the point *P*. Find the coordinates of *P*. [6] 7 It is given that $f(x) = 6x^3 - 5x^2 + ax + b$ has a factor of x + 2 and leaves a remainder of 27 when divided by x - 1. (i) Show that b = 40 and find the value of a. [4]

(ii) Show that $f(x) = (x+2)(px^2 + qx + r)$, where p, q and r are integers to be found. [2]

(iii) Hence solve f(x) = 0.

8 (a) Given that the matrix
$$\mathbf{A} = \begin{pmatrix} 4 & 2 \\ 3 & -5 \end{pmatrix}$$
, find
(i) \mathbf{A}^2 ,

(ii) $3\mathbf{A} + 4\mathbf{I}$, where \mathbf{I} is the identity matrix.

[2]

For Examiner 's Use

(b) (i) Find the inverse matrix of $\begin{pmatrix} 6 & 1 \\ -9 & 3 \end{pmatrix}$.

(ii) Hence solve the equations

$$6x + y = 5,$$

-9x + 3y = $\frac{3}{2}$. [3]

For Examiner 's

Use

9 (i) Given that *n* is a positive integer, find the first 3 terms in the expansion of $\left(1 + \frac{1}{2}x\right)^n$ in ascending powers of *x*.

(ii) Given that the coefficient of x^2 in the expansion of $(1 - x)\left(1 + \frac{1}{2}x\right)^n$ is $\frac{25}{4}$, find the value of *n*. [5]

10 (a) (i) Find $\int \sqrt{2x-5} \, dx$.

© UCLES 2013

[2] For Examiner's Use

11 (a) Solve $\cos 2x + 2\sec 2x + 3 = 0$ for $0^{\circ} \le x \le 360^{\circ}$.

[5]

[4]

For Examiner's Use

(iv) Find the speed of P when P is again at O.

For Examiner's Use

[4]
