CAMBRIDGE INTERNATIONAL EXAMINATIONS International General Certificate of Secondary Education

www.papacambridge.com MARK SCHEME for the October/November 2012 series

0654 CO-ORDINATED SCIENCES

0654/23

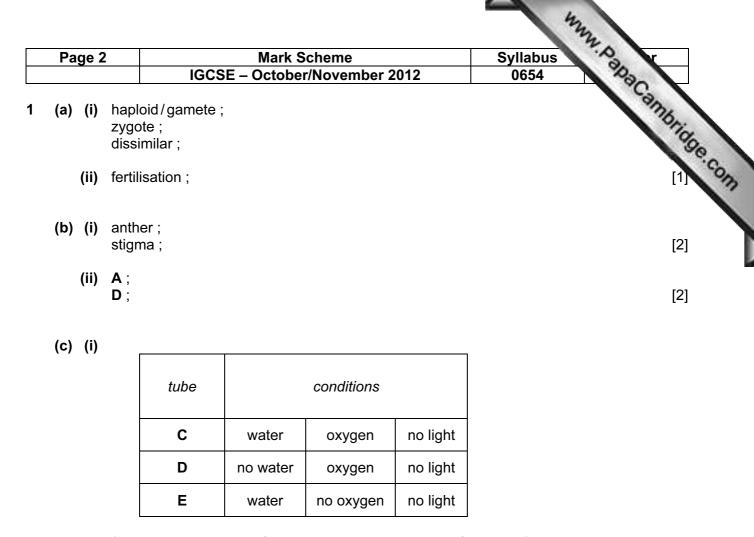

Paper 2 (Core Theory), maximum raw mark 120

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2012 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

	(all three tubes correct for 2 marks, two tubes correct for 1 mark) ;;	[2]
(ii)	(lettuce) seeds need oxygen (for germination) ; (lettuce) seeds need water (for germination) ; (lettuce) seeds do not need light (for germination) ;	
	(max 2 marks if germination not mentioned)	[3]
		[Total: 13]
(a) (i)	78 (%) ;	[1]
(ii)	in mixture	

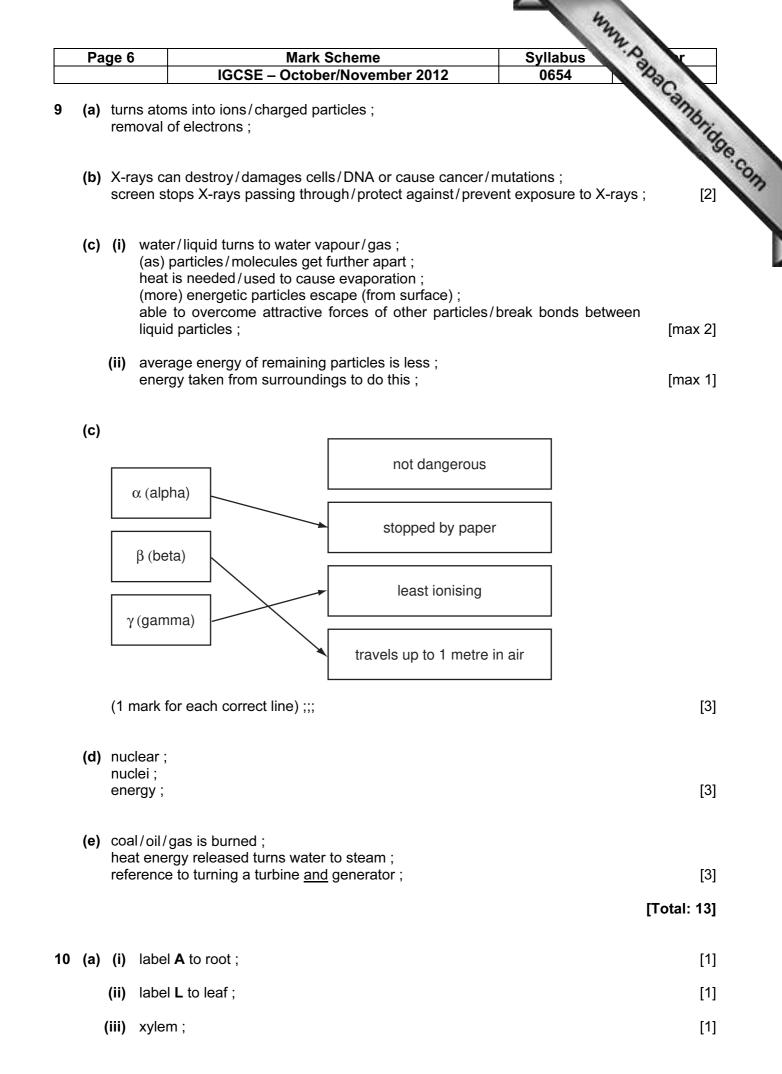

2

(ii) *in mixture*idea of variable composition ;
nitrogen not bonded to oxygen ; *in compound*fixed composition ;
has a chemical formula ;
nitrogen bonded to oxygen ;
(iii) carbon monoxide ;

	e 3 Mark Scheme Syllabus	
	IGCSE – October/November 2012 0654	230
(b) (i)	covalent ; ionic/electrovalent ;	ambrio
(ii)	in nitrogen two non-metal (atoms) are bonded ; in magnesium nitride bonding is between metal and non-metal ;	PapaCambride [2]
(iii)	idea that ratio of magnesium atoms to nitrogen atoms is 3:2;	[1]
	our change (from red) to blue ; monia given off ;	[2]
		[Total: 11]
(a) A –	constant speed ;	
B –	(constant) acceleration/increasing speed ;	[2]
	ance covered = speed × time ; × 90 = 1800 m ;	[2]
(c) (i)	(resistance) = voltage/current ; = $12/2$ (= 6Ω) ;	[2]
(ii)	R = R1 + R2; = 12(Ω);	[2]
		[Total: 8]
(a) (i)	any number above 20 000 (Hz) ;	[1]
(ii)	longitudinal ;	[1]
(b) (i)	more drinking attempts from smooth than rough ; use of figures/almost no attempts from rough ;	[2]
(ii)	reference to water having a smooth surface ; sound waves scattered in many directions from a rough surface/n	iot
	scattered from smooth surface ; bats receive fewer echoes from a smooth surface/more echoes from roug surface ;	gh [max 2]
(c) (i)	(hearing) ultrasound ;	[1]
(ii)	B ; A ;	[2]
(iii)	more likely to be killed by bats ; before they can reproduce ;	[2]

Pa	ige 4		Mark Scheme Syllabus	o r
	<u> </u>		IGCSE – October/November 2012 0654	Show .
(a)	kills filtra	orinatic (harm ation ; noves s	on ; hful) microorganisms ; solids ;	o aba Cambrida
(b)	(i)	red ; dye g	iving only one spot matches red (in P) ;	[2]
	(ii)	S ;		[1]
	(iii)		hat impurities may be hazardous to health ; hat impurities may compromise the colour ;	[max 1]
				[Total: 8]
(a)	hea kine		either order)	[2]
(b)	(i)	(as) p heat i (more able f	/liquid turns to water vapour/gas ; particles/molecules get further apart ; s needed/used to cause evaporation ; e) energetic particles escape (from surface) ; to overcome attractive forces of other particles/break bonds betwee particles ;	n [max 2]
	(ii)		ge energy of remaining particles is less ; y taken from surroundings to do this ;	[max 1]
(c)			cles touching and regular ; rangement for solid but random arrangement for liquid ;	[2]
(d)	<i>e.g.</i> how the	, v little o fractio	n of efficiency ; or how much energy is wasted in a device ; n of energy which is usefully transferred in a device ;	
			wasted in inefficient machines ; a device is at not wasting energy ;	[max 1]
				[Total: 8]
(a)	(i)		ncisor/canine ; nolar/premolar ;	[2]
	(ii)	increa	/grind ; ase surface area ; of better access for enzymes ;	[max 2]
