City Café (CC)

When George Brown left school he worked as a chef in several restaurants but he had always wanted to be his own boss. He set up City Café (CC) as a sole trader 15 years ago. He purchased a building with \$10 000 he received from his grandfather and made it into a café. It is located in the centre of Main City, in country X. George works very hard and is willing to take risks. He creates his own recipes for the café and his customers like the food.

CC has been successful every year and George has always paid himself a high salary. However, he now wants to increase the profit from CC by expanding the café. It is already open every day from 08:00 to 20:00 and in order to serve more customers he needs a larger café.

The café is located in a very busy shopping mall. George has undertaken some market research and found out that 50% of his customers visit the café every day. The other 50% of customers visit less frequently and are often attracted by the special menu items on the board outside the café.

George is considering two options for expansion.

Option 1:

Buy the building next door and make it into one larger café that can serve 50% more customers. The building became empty after a clothes shop closed. The cost of the shop is \$20 000 and it will cost \$10 000 for redecorating and building work.

Option 2:

Move to a new building 10 kilometres away in another part of the city. This building is twice as large as the existing café and will cost \$2 000 a year to rent as it is not for sale. George will be allowed to redecorate and he will need to buy equipment for the kitchen. The total cost for this will be \$5 000. It is in a busy part of the city with many shoppers visiting the area.

Daily News

The Government has forecast that interest rates will be increased later this year. This is very worrying for many local businesses that require finance. Country X has a fast growing economy and the Government does not want this to lead to higher inflation.

A multinational coffee shop chain wants to open cafés in malls all over country X, attracted by the high rate of economic growth. Local businesses are worried about the competition from this business as it benefits from economies of scale. Some market researchers think that customers will prefer to stay with their local café and not use an international style of café.
