

CAMBRIDGE INTERNATIONAL EXAMINATIONS

Cambridge International General Certificate of Secondary Education

MARK SCHEME for the March 2015 series

**0417 INFORMATION AND COMMUNICATION
TECHNOLOGY**

0417/21

Paper 2 (Practical Test A), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the March 2015 series for most Cambridge IGCSE[®] components.

® IGCSE is the registered trademark of Cambridge International Examinations.

International Teas

We specialise in growing fine teas from all producing areas of India. Different regions include Kangra, Darjeeling, Assam and Nilgiri. You will see in our catalogue that we offer a huge number of tea varieties in a wide range of qualities up to the very highest and most sought after. It shows the number of varieties of teas we hold per country and the value of that stock:

are regular tea drinkers. Some teas, such as Darjeeling, are grown exclusively in India. They are regulated and certificated for authenticity by the Tea Board of India. The Indian production companies have come to own many worldwide brands.

Tea is consumed in the form of the tea leaves where it is purchased from stalls that are to be found in most urban streets. It is generally served with milk and sugar with the leaves being boiled again with the milk and sugar and left in the infusion. The leaves are then strained before serving. Some regional and cultural variations on tea include 'Masala Chai' and 'Kadak Chai'. This latter is a strong,

almost bitter tea of the mountain communities of North India.

Masala Chai

'Masala' means 'a blend of spices'. So, Masala Chai is literally 'spiced tea'. Our take on premium Darjeeling cardamom and ginger. flavour (without being aromatic finish. We suggest two heaping teaspoons per cup, boiling water for 7-10 minutes. Add sugar, cream or soy if desired.

Tea production this year

This year production has been good in the north of the country due to well-timed monsoon rains. This has led to an increase in yields of some 6% year on year. Drought

conditions in the south have caused a drop in production. The drought was followed by low temperatures and heavy rains. These conditions led to lower production by some 5%. Overall, though, tea production nationally has increased this year. Tea prices have held up and increased in most auctions over last year. Despite increasing tea production, India still imports some tea, while exporting to new and emerging markets such as Iran.
