

**MARK SCHEME for the October/November 2010 question paper
for the guidance of teachers**

**0417 INFORMATION AND COMMUNICATION
TECHNOLOGY**

0417/02

Paper 2 (Practical Test A), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

The screenshot shows the Microsoft Access design view for a table named 'N10eks'. The table structure is as follows:

Field Name	Data Type	Description
ID	AutoNumber	
Make	Text	
Model	Text	
Size	Number	
Price	Currency	
Skill Level	Text	
Wind condition	Text	
Use	Text	
Number	Number	
Stock item	Yes/No	

A callout box points to the 'Data Type' column with the following text:

Data types

- Field names identified and used 1 mark
- Size numeric 1 dp
- Price currency 2 dp
- Number Integer 2 marks (Check on reports)
- Stock item yes/no 2 marks (1 mark if text)
- Ignore ID field – or other key fields

Power kites have been around for over 30 years. The sport of power kiting has progressed unbelieveably in the last 10 years. It is now a sport of 2 line kites to the immense popularity of the power kite. We have watched the sport evolve and with it we have brought the top manufacturers of kites in the world. There is no other sport that gives you such an adrenaline rush. Remember the wind is always free!

mediate kite practice and learning driving skills. We advanced jumping or race practice. Be careful on you will need armour protected clothing as speeds will be much faster than over grass and the surface is very hard if you crash!

Page layout changes here 1 mark

Before you use a kite to ride, you need to learn to fly it. A two line kite is easy to learn to fly. One line is attached to each wrist and you pull the left one to make the kite fly to the right. Landing the kite is the right. Landing the kite is the edge of the window ground. you. At fly lower

Our Extreme Sports Centre gives you the opportunity to come and experience the world of kiting from two line kites. Our centre has everything you need to get started, complete, from equipment hire to lessons. We have now moved to our new home on a

kite is needed for surfing, boarding, grinding, etc. The top two lines are the power lines and the bottom two provide the brakes. The lines are connected to a harness. When you pull the lines, the kite will take off and when you release the lines, it will come down and land. It is important to fly without the assistance of a

practice and safety to be covered.

We strongly recommend that you take some tuition and that you follow
some basic safety rules:

1. Do not attempt to learn power kiting without training
2. Insure yourself with third party insurance
3. Always wear safety protection (helmet and pads)
4. Never fly near power lines, roads, airports, or trees
5. Never fly in stormy weather
6. Never fly upwind of a group of people
7. Never over estimate your own ability

Learn to use your kite				
<u>Course</u>	<u>Level</u>	<u>Duration</u>	<u>Cost</u>	<u>Group</u>
Power kite taster	Beginner	1 hour	15.00	Max 4
Basic driving techniques	Intermediate	1 day	75.00	Max 4
Advanced flying or driving skills	Advanced	3 hours	80.00	1 to 1

If you follow all those rules, you will also maximise your chances to
have a great time flying your kites! We require that you use kite killers
when flying on the club fields. The kite killers are attached to the
wrists to the kite brake lines. If you are flying a kite, you must
set the brakes on and bring the kite down to the ground.

One of the most important aspects of kiting is kite safety. Recognising surrounding
of the weather conditions is vital. You can get into serious trouble before you realise it.
Our experiences and teach you when you fly your kites.

Next to the kite, safety must never be compromised. Ensure you
wear your kite safety equipment for the kite sport you are

We have been running, and are planning, a number of kiting holidays for club members. These are for specific sports and in well known locations around the world. For example, last year we led a successful and enjoyable trip to Sharm el Sheikh in Egypt to learn to kite surf. Kite surfing is a three dimensional water sport that has evolved from surfing, skate boarding and power kiting. Being able to pull 25-30 foot jumps combining aerial tricks and board jumps gives power kite the "splash of colour" it truly deserves.

We are also going back to Norway for a snow kite holiday. As snow kiting is becoming more and more popular, more and more people want us to

Here are details of planned trips:

<u>Destination</u>	<u>Country</u>	<u>Sport</u>	<u>Dates</u>
Sharm el Sheikh	Egypt	Kite surf	May 2011
Bergen	Norway	Snow board	Jan 2011
Denver	USA	Para gliding	Sept 2011
Dubai	Emirates	Desert trekking	Oct 2011
Oxford	UK	Kite festival	June 2011
