UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS International General Certificate of Secondary Education

## www.papacambridge.com MARK SCHEME for the October/November 2008 question paper

## 0637 CHILD DEVELOPMENT

0637/01

Paper 1 (Theory Paper), maximum raw mark 100

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

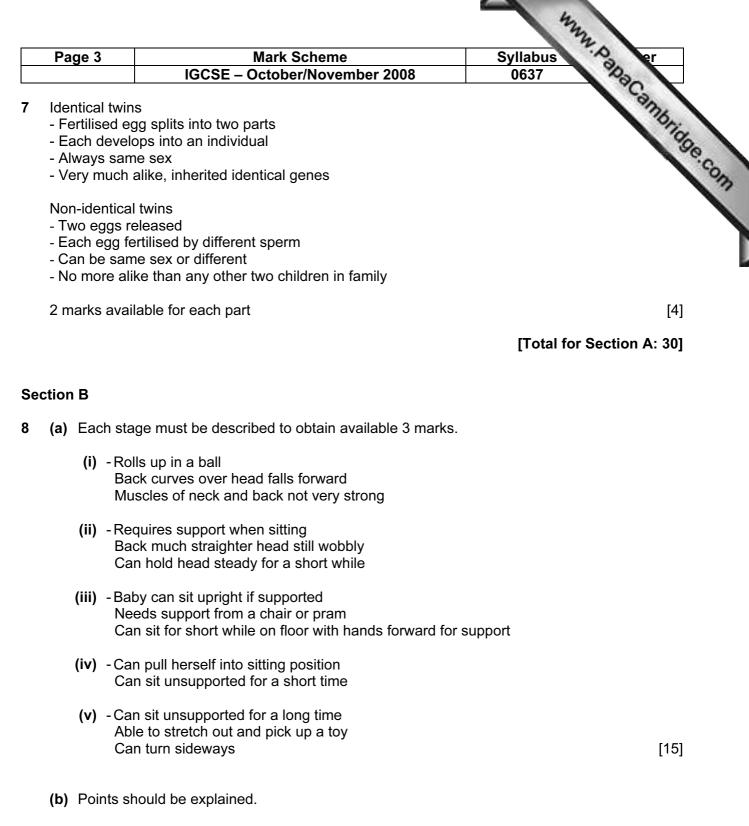

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2008 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

## Section C

- 10 Candidates to answer either (a) or (b)
  - (a) High level response 13–20 marks.
    - Both parts of question will be answered; responses will be explained and described.
    - Enables children to find out about themselves and the World, (this must be fully explained to include some of the following) develop speech and muscles, discover, create, concentrate, learn new skills, role-play, use imagination, co-operate etc.
    - Help towards happiness
    - Prevents boredom
    - Can reduce stress
    - Can divert aggressive instincts. Points given in m/s must be 'described'
    - Right for age of child
    - Strong enough for child to use
    - Will hold interest
    - Safe to play with (safety regulations may be included)

Medium level response 7–12 marks.

Some detail will be given to a greater or lesser degree, one section may be in more detail that the other.

Low level response 0-6 marks.

Answers will be superficial. They will lack explanations and descriptions and may take the form of a list.

(b) High level response 13–20 marks.

Answers will clearly show how bacteria can contaminate food and use this information to explain how to prevent food poisoning.

Bacterial contamination due to:

Dirt on hands after toilet, changing nappies etc. – wash and dry hands on a clean towel before preparing food.

Dirty sinks, surfaces, dish cloths, towels, utensils - keep kitchens clean, anti bacterial cleaners etc.

Mice, rats, flies and their droppings - floors left over food will attract flies, mice, rats etc.

Bacteria in septic cuts and sores - cover with waterproof dressing.

Coughs and sneezes – bacteria and other germs live in nose and throat – do not cough or sneeze over food.

Licking fingers or spoons - bacteria from the mouth will not enter the food if this is not done.

Uncooked meat or poultry contain bacteria. Keep separate to avoid cross contamination. Cook food thoroughly to destroy harmful bacteria.

Bacteria thrive in warm moist conditions. Store food in cold/cool conditions - refrigerate - freeze - keep food covered etc.
