May/June 2010

2 hours 30 minutes

NAME		
CENTRE NUMBER		CANDIDATE NUMBER
COMPUTER ST	TUDIES	

Candidates answer on the Question Paper.

No Additional Materials are required.

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a soft pencil for any diagrams, graphs or rough working.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO **NOT** WRITE IN ANY BARCODES.

Answer all questions.

No marks will be awarded for using brand names of software packages or hardware.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

For Examiner's Use

This document consists of 19 printed pages and 1 blank page.

10 A small company runs six cars in its fleet. They have produced a spreadsheet to corunning costs over a five month period:

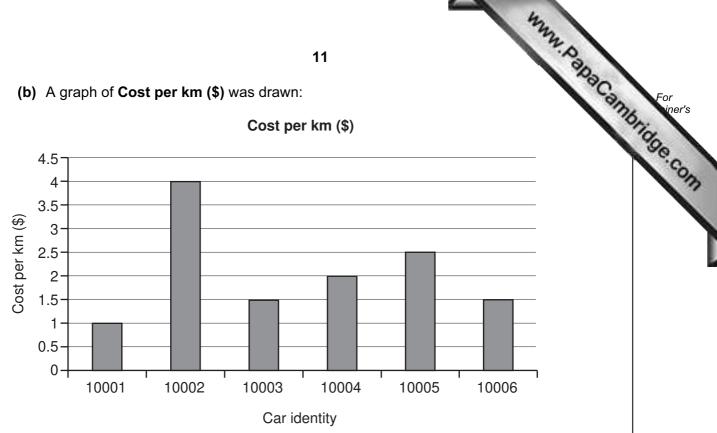

1	Tide
st	C.C.

	Α	В	С	D	E
	Car Identity	Total number	Cost per km	Total cost	Average cost
1		of km	(\$)	(\$)	per month (\$)
2	10001	30 000	1.00	30 000	6 000
3	10002	20 000	4.00	80 000	16 000
4	10003	50 000	1.50	75 000	15 000
5	10004	30 000	2.00	60 000	12 000
6	10005	20 000	2.50	50 000	10 000
7	10006	30 000	1.50	45 000	9 000
8		Averages:	2.08	56 667	11 333

(a) It was decided to print out the spreadsheet formulas from D2 to E8. Using the grid below, show what formulas would be printed:

	D	E
1	Total cost (\$)	Average cost per month (\$)
2		
3		
4		
5		
6		
7		
8		

Cost per km (\$)

(i)	Which cells were highlighted to produce this	graph?
-----	--	--------

••••
[2]

(ii) Describe how the average value of 2.08 would be shown on the graph.

[1]

(c) The data in cell C6 was changed to 3.00. Which cells would be updated automatically?

•••••
[2]

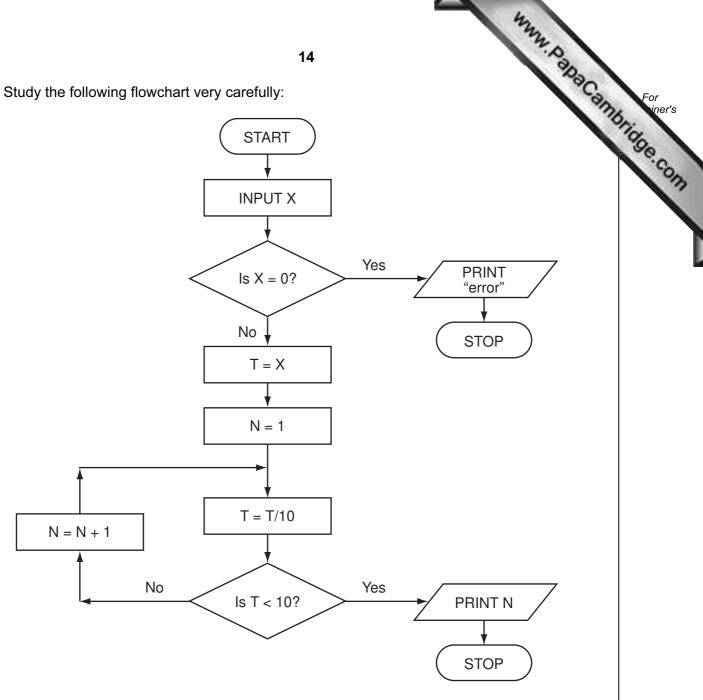

11 A database has been set up showing information about cars:

se has beer	า set up showi	12 ng information	about cars:		No of cylinders 4
Car ref	No of doors	Engine (litres)	CO ₂ (g/km)	Fuel used (km/litre)	No of cylinders
Α	3	1.4	145	15.3	4
В	4	2.0	193	12.3	4
С	5	2.5	231	10.9	6
D	3	2.0	190	11.2	6
E	4	1.3	120	17.5	4
F	5	1.8	180	14.6	4
G	4	3.0	240	9.5	6
Н	4	1.2	115	19.7	3

(a) Using Car ref only, write down which cars would be output if the following search condition was used: (No of doors = 4) AND (Fuel used (km/litre) > 15) [2] (b) Write down a search condition to find out which cars have engines larger than 1.8 litres OR have CO₂ emissions higher than 150 g/km. (c) The database is sorted in ascending order on Fuel used (km/litre). Using Car ref only, write down the results of the sort.

(a)	State two items of hardware needed to enable a standard computer system part in video conferencing. 1
	1
	2
	[2]
(b)	State two additional items of software that would be needed for the video conferencing to take place.
	1
	2
	[2]
(c)	Describe two potential problems when using video conferencing.
	1
	2
	[2]

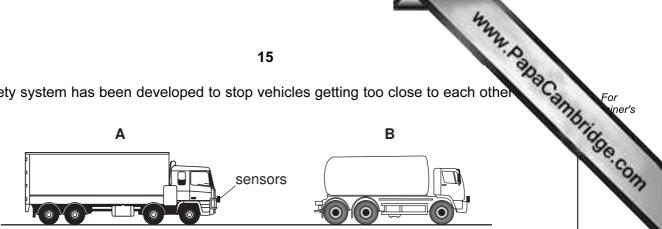

13 Study the following flowchart very carefully:

What output would you expect if the following data was input into the flowchart?

х	OUTPUT
-150	
540	
0	

14 A safety system has been developed to stop vehicles getting too close to each other road.

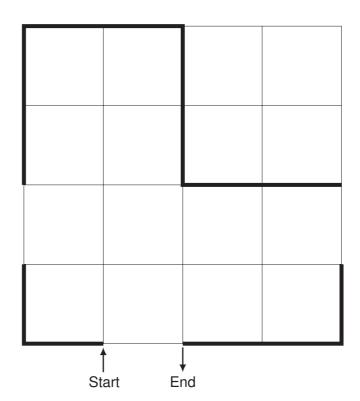

If vehicle **A** gets too close to vehicle **B**, the brakes are automatically applied by a computer system in vehicle A.

(a)	What type of sensors could be used on the vehicles?
	[1]
(b)	Describe what the safety system does to constantly monitor how close the vehicle is to the vehicles in front and decide when to take action.
	[4]
(c)	Describe two potential problems with this safety system.
	1
