Candida	tes answer on the Question Paper.	
No Addi	tional Materials are required.	
u <b></b>		

## **READ THESE INSTRUCTIONS FIRST**

Write your Centre number, candidate number and name in the spaces at the top of this page and any additional pages you use.

Write in dark blue or black pen. Do not use staples, paper clips, glue or correction fluid. DO NOT WRITE IN ANY BARCODES.

No marks will be awarded for using brand names of software packages or hardware. Answer all questions.

At the end of the examination, fasten all your work securely together. The number of marks is given in brackets [] at the end of each question or part question.

The syllabus is approved for use in England, Wales and Northern Ireland as a Cambridge International Level 1/Level 2 Certificate.

This document consists of 14 printed pages and 2 blank pages.

1 Tick whether the following statements are **true** or **false**.

	true (✓)	false (✔)
Tablet computers have touch screens.		
Smartphones will only connect to the internet through WiFi.		
A tablet computer has a separate keyboard.		
Smartphones use a touchpad.

Describe the process of setting up this type of conference.

..... .....[4] (b) The organisation has a computer network which is connected to the internet. The router contains a firewall. Explain why a firewall is needed. ..... 

.....[4]

**11** The headteacher of a school has decided to allow all data about the students to be backed up onto the cloud.

(a)	Explain the ICT term cloud.
	[2]
(b)	Even though the cloud appears to be an excellent resource, it has many problems.
	Discuss the benefits and drawbacks of storing data in the cloud.
	[6]

**12** A householder has installed a computer controlled burglar alarm.

Describe the processing involved in a computer controlled burglar alarm.

13 Name three components of an expert system.

1	 
2	 
3	
0	 [3]

- 14 Car production lines use robots to manufacture the vehicles. The robots have devices attached to their arms to help in the manufacturing process.
  - (a) For each of the named devices, describe their use on a car production line.

eo camera	
	[1]
nt sensor	
	[1]
ssure sensor	
	[1]

(b) Give three advantages to the company of using robots rather than humans to manufacture cars. ..... ..... ..... ..... .....[3] (c) Give three disadvantages to the company of using robots rather than humans to manufacture cars. ..... ..... .....[3] (d) Cars have to be designed before they can be manufactured. 3D printers can be used to produce models of a car. Describe the process involved in producing the models. ..... .....[3]

15	(a)	A router is connected to a LAN.
		Describe the function of a router.
		[2]
	(b)	Different methods can be used to connect computers to networks.
		Describe <b>two</b> advantages for each of the following methods.
		WiFi
		[2]
		Satellite
		[2]
		3G/4G
		[2]

- **16** The following is part of a household budget spreadsheet. Cells B9 and B14 contain formulas. The owner wishes to test the spreadsheet which must follow the following rules:
  - No individual outgoings can be greater than \$100
  - The balance can be negative or positive

	А	В	С
1	Household budg	et	
2			
3	Outgoings		
4	Heating	\$45.00	
5	Food	\$80.00	
6	Travel	\$35.00	
7	Utilities	\$61.00	
8	Clothes	\$40.00	
9		\$261.00	
10	Income		
11	Total Salary	\$280.00	
12			
13			
14	Balance	\$19.00	
15			

(a) Describe four testing strategies you could use to test the model.

[4

(b) Describe how you would change the spreadsheet so that it alerts the user if any outgoing is greater than \$100. ..... .....[3] 17 A new toll road that drivers pay to use has just opened. The company that owns the road uses Electronic Number Plate Recognition Systems to collect payments from drivers automatically. Describe how an Electronic Number Plate Recognition System works. ..... ..... .....[4] For each of the following safety issues suggest a possible strategy for preventing the problem. 18 Electrocution .....[1] Fire ..... .....[1] Tripping over trailing leads ..... Heavy equipment falling ..... .....[1] **19** The director of a major electronics company announced that 'homes are about to become much smarter'. He was talking about the use of home appliances that could connect to the internet. These include central heating systems, ovens, televisions and fridges.

Devices like these need to connect to the internet. Discuss the advantages and disadvantages of connecting them to the internet.
