MARK SCHEME for the May/June 2013 series

0680 ENVIRONMENTAL MANAGEMENT

0680/12

Paper 1, maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

General notes

Symbols used in Environmental Management mark schemes.

- / separates alternatives for a marking point other valid ways of expressing the same idea are also credited
- ; separates points for the award of a mark
- [3] indicates the number of marks available
- *italic* indicates that this is information about the marking points and is not required to gain credit italic text is also used for comments about alternatives that should be accepted, ignored or rejected
- ora or reverse argument shows that an argument from an alternative viewpoint will be credited
- AW alternative wording, sometimes called 'or words to that effect' AW is used when there are many different ways of expressing the same idea
- the word / phrase in brackets is not required to gain marks but sets the context of the response for credit
 e.g. (nuclear) waste nuclear is not needed but if it was described as a domestic waste then no mark is awarded
- volcanic underlined words the answer must contain exactly this word
- ecf error carried forward if an incorrect answer is given to part of a question, and this answer is subsequently used by a candidate in later parts of the question, this indicates that the candidate's incorrect answer will be used as a starting point for marking the later parts of the question

2 (a) 1 mark for:

tundra:

fishing / whaling/ hunting for sensible animal;

trf:

Traps for arboreal animals/ ground livers / blowpipes /poison arrows;

desert:

roots/tubers etc. / traps;

2 marks for:

poor lands so not coveted by others;	
no competition;	
these lands no/little use for agriculture;	
remoteness;	
high food availability;	
idea of sustainability linked to food abundance, low population;	[3]

(b) (i) 20-8 = 12; $12/20 \times 100 = 60\%;$

reference to ecotourism;

(ii)	correct plot; straight line joining points;	[2]
(iii)	there has been a continued fall in forest cover;	[1]
(iv)	conserving encourages tourism / forests attract tourists / people; which brings in money / profit; which can be used to further conserve and fund other projects;

[Total: 10]

IGCSE – May/June 2013 0680 3 (a) (i) C, D, E	12
D,	
(0) for 0 or 1, (1) for 2, (2) for 3	[2]
 (ii) taiga: coniferous; conical; evergreen; leaves small/ waxy / tough / needle; shallow roots; leaves all over tree ; 	
TRF: spreading shape; evergreens overall but loose leaves all time; large /broad / soft leaves buttress roots; leaves only at top ;	
monsoon:	
as TRF; deciduous; leaves as TRF; no buttresses on trees;	
max 1 if no evidence of comparison, i.e. just two descriptions	[2]
 (b) (i) carbon sink / or the idea of reducing gh effect / global warming; ref biodiversity / species / habitat loss; ref medicines etc.; ref wood; ref wood; 	
ref food; ref reduced (soil) erosion;	
ref leaching; ref effect on rainfall;	[3]
 (ii) efficient timber use; recycle wood / products; use wood alternatives; agroforestry / described; tree planting; selective felling; idea of licenses / quota or other attempt to legally limit logging, (once); ref alternative ways of finding land for farming / building; ref nature reserves / green belt; 	
pollarding;	[3]
	[Total: 10]

4	(a)	(i)	Q, Q, P (0) f	or 0, (1) for 1 or 2, (2) for 3		[2]
		(ii)	more allov	: o penetration of light; e nutrients; vs plants / phytoplankton to grow; chain;		
			too d	o sea not accessible; deep to have oil; o how oil formed (plants);		
			ref b	<i>ism:</i> iccess; ieaches ; orals / swimming / boating;		[2]
	(b)	(i)	any	2 aspects of modern technology;		
				r / satellites; er to find fish;		
			-	ooats; ess more;		
				e nets; h more;		
				h size (too) small; h more younger fish;		
				geration; go further but still keep fish;		
				ulation growth; eased demand;		
				ng all year / taking fish of all ages; ct on numbers / young / reproduction;		[4]
		(ii)	popı hung			
				nomics; culty of monitoring / ignoring rules / quotas;		[2]
						[Total: 10]
						-
