READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in. Write in dark blue or black pen. You may use a soft pencil for any diagrams, graphs or rough working. Do not use staples, paper clips, highlighters, glue or correction fluid. DO **NOT** WRITE IN ANY BARCODES.

Answer **both** questions.

At the end of the examination, fasten all your work securely together. The number of marks is given in brackets [] at the end of each question or part question.

This document consists of 17 printed pages and 3 blank pages.

(a) Look at the diagram showing some of the features of trees and forests that are u 1 life on Earth.

	(ii)	3 support nutrient cycling, 	Abria
	(iii)		Se.com
(b)		[2] in the bullet points below with features of the forest canopy and tree roots that are ful to life on Earth, as was done in the diagram for leaves of trees.	
	(i)	Forest canopy – useful features	
	(ii)	•[2] Tree roots – useful features	
		•[2]	

www.papaCambridge.com (d) The plan to pave the BR163 road between the towns of Cuiaba and Santaren located on the map) has caused a lot of controversy.

Should the rest of the BR163 be paved?

Otherwise known as the 'soyabean highway', the BR163 is the 1770km long road linking Cuiaba in the middle of Brazil to the deep water port of Santarem on the Amazon. It was begun in the 1970s. Distances along it are huge.

Roadside sign near Santarem

At the moment, half of it is unpaved dirt track, making travel difficult and slow. During the wet season it becomes a sea of red mud; trucks can be stuck for days, weeks, or even months after bridges are washed away. Under pressure from the strong farming business lobby, the government is considering paving the rest of the road with a hard surface. The paved section north of Cuiaba passes through already important areas of soyabean and beef cattle production, both major exports of Brazil.

Although the government owns the 100 km wide stretch on each side of the road, trees on the unpaved section have already been cleared as far as the eye can see. Cattle graze among the tree stumps. The only lorries on the road are carrying timber, either tree trunks or sawn planks. Illegal logging is what dominates here, not the rule of law.

	T
)	7 State the economic advantages of paving the remainder of the BR163 road.
)	[3] How strong are the economic reasons for paving the road? Explain what you think.
)	[2] How far do you agree with the environmentalist that half the Amazon rainforest
,	will be gone by 2030? Answer as fully as you can with the help of the information given.
	[4]

(e) Describe what makes tropical rainforests unique (different from all the other for the world).

www.papaCambridge.com[3]

Look at the spider diagram showing examples of sustainable ways to use tropical (f) rainforests.

Why are all of these in decline? (ii)

(i)

.....[3]

(iii)	9 State two ways in which sustainable logging of hardwoods is different filogging taking place along the sides of the BR163 in Brazil.	bridge.com
(iv)		
	[4] [Total: 40 marks]	

Four possible sites for locating a school rain gauge are marked A-D on the (iv) the school and its surroundings.

Which one of these sites is best for obtaining accurate rainfall measurements? Explain why.

Show these percentages on a pie graph.

climatic hazard	% of deaths
tropical cyclones	63
floods	33
drought	4

[3]

(ii) World map showing the distribution of tropical cyclones

www.papaCambridge.com 13 Look at the world map showing the distribution of tropical cyclones. State what they have in common for places where they form, direction of movement and areas affected. formation movement..... areas affected.....[4] Explain what makes tropical cyclones so dangerous for people, sometimes leading (iii) to great loss of life.

.....[4]

(c) One country which regularly suffers from drought is Niger in West Africa.

Location of Niger

Use the map to describe the geographical location of Niger. (i)

www.papacambridge.com (v) Average annual rainfall is 554 mm. Looking at the climate graph, explain w and livestock farmers in Niger depend greatly upon this amount of rain falling year. _____ (vi) Average annual rainfall in Niger is described as unreliable. What is meant by this and how can it lead to drought? _____[2]

(d)

Effects of two droughts

Niger 2005	Europe 2006
Over 3 million of its 13 million people affected by food shortages	 Record low output for many crops – up to 50% lower than average
• Niger is a debt-ridden country; it had to rely upon food aid from the UN and aid organisations	 UK gardeners banned from using hose pipes and sprinklers
Countless children were dying from severe malnutrition	 Swimming pools around the Mediterranean remain empty of water
• Worst affected were nomadic herders such as the Fulani; up to 70% of their livestock died through lack of fodder	 Such poor pastures that livestock farmers in France forced to start using winter stocks of fodder such as hay
Nomads move their animals towards available pastures where they come into conflict with crop farmers for scarce resources	 Lower electricity output from HEP stations
Information about Nigor	Information about Europa
Information about Niger Income per head – US\$250 per year	Information about Europe Income per head – US\$11,800 per year
Birth rate – 55 per 1000	Birth rate – 12 per 1000
Fertility rate - 7.91 per woman	Fertility rate – 2.1 per woman

17 Describe how the effects of the droughts were different between Nig
17 20
Describe how the effects of the droughts were different between Nig
[3]
Two main factors explain the different effects of the droughts for Niger and Europe. What are they?
[1]
Describe how and why these led to different effects in Niger and Europe.
[3]
