ENVIRONMENTAL MANAGEMENT

0680/01

Paper 1

October/November 2007

1 hour 30 minutes

Candidates answer on the Question Paper.

Additional Materials:

Ruler

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a soft pencil for any diagrams, graphs or rough working.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Answer all questions.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

For Examiner's Use

that the cannoning con

1 Look at the photograph below, which shows elephant grass. It is possible that the could be used as an alternative source of energy.

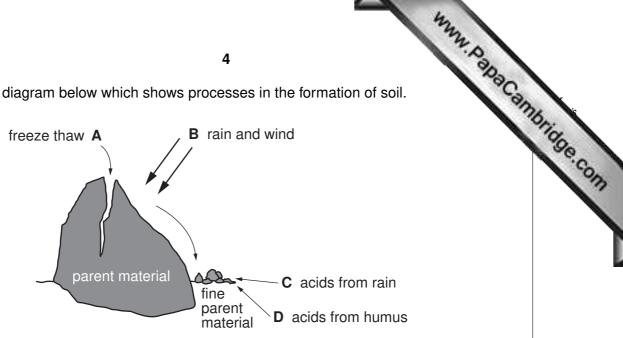

(a) (i)	State one characteristic of elephant grass which is shown in the photograph.
	[1]
(ii)	What name is given to this source of alternative energy?
	[1]
(iii)	Explain why burning elephant grass would be less damaging to the environment than burning oil or coal.
	[2]
(b) (i)	Among the gases released into the atmosphere are sulphur dioxide and nitrogen oxides.
	Name and describe the environmental problems caused by these gases.
	[3]

(ii)	How could the pollution caused by these gases be reduced?
	[3]

[Total: 10]

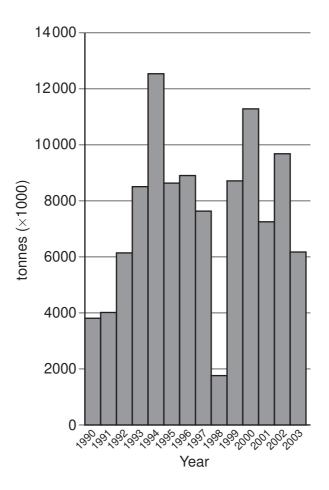

2 Look at the diagram below which shows processes in the formation of soil.

(a)	(i)	Of the four processes (A–D) shown, give the letters of the two processes which a mechanical and the two processes which are chemical?	re
		Mechanical and	
		Chemical and [2]
	(ii)	Which of the processes A–D involves the action of living things?	
		[1]
(iii)	Describe the process of freeze-thaw weathering.	
		[2	2]
(b)		se processes give rise to a mixture of soil particles (clay, silt and sand) and mineral ne two other components of soil needed for plant growth.	ls.
		[2	2]
(c)		cultural practices around the world are leading to soil erosion. How can this buced?	Эе

MMM. Palla Cambridge. com 3 The graph below shows the total catch for the anchovy fishery, off the west coast of America, from 1990 until 2003.

(2)	Give	tho	VAAR	for	tho
(a)	ı Give	une	vear	IOI	une

smallest catch

(i)

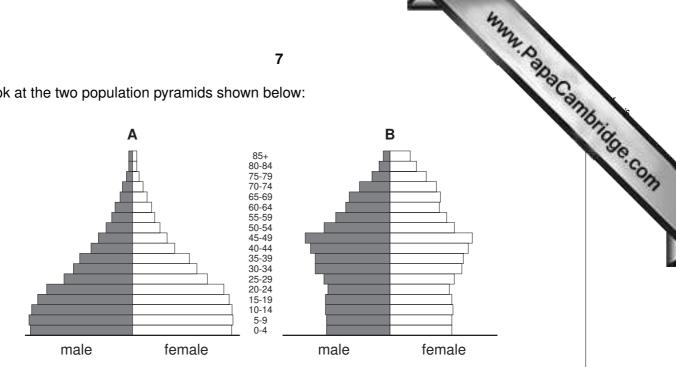

(ii) largest catch

Fish catches often depend on ocean currents. The presence of the Peruvian (Humboldt) current ensures a large anchovy catch. Explain how cold currents do this.

re)	

	The state of the s	
	6	
	(ii) The lowest catch in the graph was caused by a change in this current due Nino event. Describe how this event caused a low catch.	Midi

5 Look at the diagram below which shows what happens to solar energy.

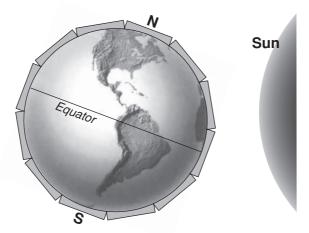

(a)	(i)	The three labels A, B and C are processes; absorption, radiation and reflectio							
		Give the correct process for each of the letters shown in the diagram.							

•								
Α	 							

В

С	 [2]

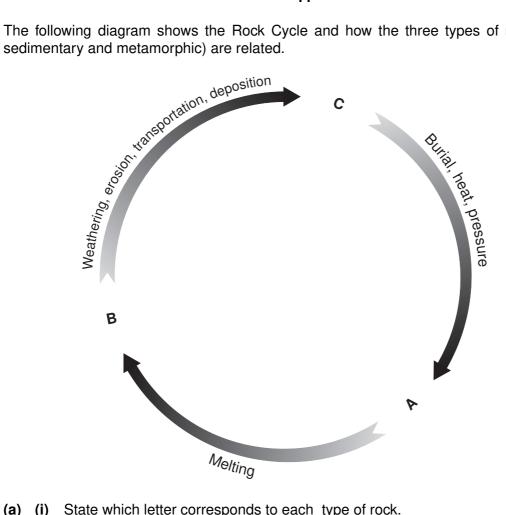

www.PapaCambridge.com (ii) Look at the diagram below. The amount of solar energy which falls on the sur the earth (insolation) varies from place to place and from time to time. This acco for warmer and colder climates and the seasons.

	In which hemisphere, in the diagram above, is it Summer? Explain your answer.
	[2]
(b) (i)	Two main differences between Summer and Winter are temperature and daylength. How do these influence the amount of solar power that can be generated?
	[2]
(ii)	Solar power is an example of alternative energy. Such sources are mainly alternative to fossil fuels. Suggest two reasons why it is a good idea to develop alternatives to fossil fuels.
	[4]
