## 2 English as a global language

The extracts on this page and the next are from an online debate, which deals with the emergence of English as a global language and how the use of English globally might change in the future.

**Discuss what you feel are the most important issues raised here relating to the changing importance and use of English as a global language.** You should refer to specific details from the extracts as well as to ideas and examples from your wider study.

### Should English be the worldwide primary language?

#### YES

- There is no advantage in having more than one language in the world. The fact that we now have more than one is proving to be a major hindrance with a huge amount of effort spent on translation. Since English is already spoken by 1.5 billion people and dominates the internet (45% of all webpages) and entertainment, it makes sense to push the trend further so that one day it will be the only language and you can say “hello” and everybody everywhere will understand! 5
- English is already in the process of becoming the universal and primary world language. We’re already halfway there. As for culture, other languages don’t have to die. 10
- Forget nationalism. Your linguistic heritage is far less important than the continuity of the world and humankind. If we are to gain more understanding of one another, we need to move towards one another and a common language will help us communicate that much more easily.
- A universal language is necessary for multi-cultural understanding as misunderstandings can arise from an inability to clearly communicate not only facts but fears, feelings and creative solutions. 15
- A universal language would be the perfect springboard to catapult growth and equality in society.
- I believe that organisations such as the United Nations would work far better if the heads of states and the people who represented their countries all spoke a mutual language. When multi-national companies do business, such as American companies with Japanese companies, it is far easier if CEOs can converse freely rather than using translators, which slow down procedure and are liable to not translate completely correctly. 20
- 25

#### NO

- All languages are equally important. All countries should be free to speak their own languages and not just learn one common language. If you wish to do business with a country you should learn their language and I see this as just an easy way out for English speakers.
- Languages are tied to the way humans think. English shouldn’t be the world’s *lingua franca*, as it shouldn’t be French or German or any other language, in this regard. Languages are vectors of culture and boiling the world’s culture down to one language is dangerous for humanity. I believe diversity is good and benefits all of us. 5

- English should not be the primary language of the world, because it would deny too many their cultural identity. Language is part of a culture and that's why people in minority groups are trying to save their own language. 10
- Standardizing a language worldwide is an impossible task given the fact that language is constantly changing. Despite the normalizing effects of modern media such as the internet and television, language is always changing. Any attempt to standardize a language worldwide will fail because languages will diversify to mutually unintelligible dialects over time. 15
- The world is what it is because of its diversity. A language is not simply a means of communication. It is a very intricately layered part of the culture of the community speaking it. It may not be possible to express, in English, an idea which exists in, say, German- or Swahili-speaking communities, for the very simple reason that they may be describing phenomena unheard of in English-speaking communities. What is the need to standardize the population of the world? Must we eliminate all the myriad differences between the different cultures of Earth to achieve unity among humankind? No. Accepting these differences and appreciating the variety of thought and expression they bring are the things to do. 20
