Paper 3 Written Paper MARK SCHEME Maximum Mark: 75

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2016 series for most Cambridge IGCSE[®], Cambridge International A and AS Level components and some Cambridge O Level components.

® IGCSE is the registered trademark of Cambridge International Examinations.

Ρ	age 2		Syllabus	Paper			
		Cambridge International A Level – October/November 2016	9608	31			
1	(a)	+2.5 = 01010000000 0010 Give full marks for correct answer (normalised or not normalised)		[3]			
		= 10.1 = 0.101 $ imes$ 2 ² // evidence of shifting binary point appropriately					
				[Max 3]			
	(b)	–2.5 10110000000 0010 Give full marks for correct answer					
		One's complement of 12-bit mantissa of +2.5 <u>101011111111</u> – allow +1 to get two's complement <u>101100000000</u>	v f.t.	[1] [1]			
				[Max 3]			
(c)		3 Give full marks for correct answer		[3]			
		= 0.011 X 2 ³ // exponent is 3 = 11.0 // (1/4+1/8) * 8		[1] [1]			
				[Max 3]			
	(d)	(i) Not normalised		[1]			
		(ii) First two bits should be different for normalised number // because the number starts with 00		[1]			
	(e)	reduced accuracy increased range		[1] [1]

3 (a)		•	age frame fro bage frame fr		[1]		
(b)	Fla	ash memo		[1]			
(c)	(i)	Time of		[1]			
	(ii)						
		Page	Presence Flag	Page frame address	Additional data		
		4	1	542	12:07:34:49		[1 +1 + 1]
	(iii) (iv)		[1]				
		Page	Presence Flag	Page frame address	Additional data		

132

Accept only zero for 'additional data'

1

(d) For example:

3

Longest resident:page in for lengthy period of time may be being accessed often[1]... so not a good candidate for being removed[1]

0

[1 +1 + 1]

Least used: a page just entered has a low least used value	[1]
so likely to be a candidate for immediately being swapped out	[1]
