

UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS General Certificate of Education Advanced Subsidiary Level and Advanced Level

## PSYCHOLOGY

Paper 1 Core Studies 1

9698/13 October/November 2012 1 hour 30 minutes

Additional Materials: Answer Booklet/Paper

## **READ THESE INSTRUCTIONS FIRST**

If you have been given an Answer Booklet, follow the instructions on the front cover of the Booklet. Write your Centre number, candidate number and name on all the work you hand in. Write in dark blue or black pen. Do not use staples, paper clips, highlighters, glue or correction fluid.

Answer all questions.

At the end of the examination, fasten all your work securely together. The number of marks is given in brackets [] at the end of each question or part question.

This document consists of 4 printed pages.

## 2

## Section A (60 marks)

Answer all questions in this section.

- www.papaCambridge.com Describe two characteristics of the participants from the study by Loftus and Pickrell (false 1 memories).
- 2 From the study by Baron-Cohen et al (eves test):
  - (a) What is meant by 'theory of mind'?
  - (b) The control group were much better on the eyes test than the experimental group (of high functioning autistics and people with Asperger syndrome). What does this tell us about theory of mind? [2]
- 3 The Held and Hein (kitten carousel) study was a laboratory experiment. Describe two features of a laboratory experiment. [4]
- 4 The study by Piliavin et al (subway Samaritans) was a field experiment.
  - (a) Describe one independent variable that was manipulated. [2]
  - [2] (b) Give one advantage of a field experiment as used in this study.
- 5 In experiment 2 of Tajfel's study on intergroup categorisation, participants used a matrix (like the one below) to award points. There were three options open to participants: maximum in-group profit, maximum joint profit and maximum difference.

24	22	20	18	16	14	12	10	8	6	4	2
9	10	11	12	13	14	15	16	17	18	19	20

- (a) Using the matrix above, identify the pair of numbers that indicates **maximum joint profit**. [2]
- (b) Using the matrix above, identify the pair of numbers that indicates **maximum difference**. [2]
- 6 In their study of aggression, Bandura et al found several differences in behaviour between groups of participants.
  - [2] (a) Outline **one** difference in behaviour between male and female participants.
  - (b) Suggest one reason for this difference. [2]
- 7 Freud says in his study of little Hans that his approach does not have any scientific value. Outline two criticisms that can be made about the scientific value of Freud's work. [4]

[2]

- 3
- www.papacambridge.com 8 From the study by Langlois et al (infant facial preference), describe two findings from
- 9 Describe two conclusions from the study by Nelson (children's morals).
- 10 From the study by Schachter and Singer (emotion):
  - (a) All the participants in this study were cleared by the student health service. Give two features of the sample apart from being cleared. [2]
  - (b) Describe why the experimenters had to clear every participant with the student health service.

[2]

- 11 From the study by Maguire et al (taxi drivers):
  - (a) Describe the sequential non-topographical task. [2]
  - (b) Why was it important to do this task as well as the sequential topographical one? [2]
- 12 Prior to the experiment conducted by Demattè et al (smells and facial attractiveness) the participants filled in a confidential questionnaire asking about their senses and general health.

(a)	Give two examples of the questions asked.	[2]
(b)	Explain why <b>one</b> of these questions was asked.	[2]

- **13** From the study by Rosenhan (sane in insane places):
  - (a) Give one example of how staff interpreted the behaviour of the pseudopatients. [2]
  - [2] (b) How did the real patients interpret the behaviour of the pseudopatients?
- 14 In the study on multiple personality disorder, Thigpen and Cleckley carried out a number of tests. Briefly describe the findings of **two** of these tests. [4]
- **15** From the study by Veale and Riley (mirror gazing):
  - (a) Why, according to the cognitive behavioural model of body dysmorphic disorder, is mirror gazing damaging? [2]
  - (b) Give two objects or surfaces, other than mirrors, used by body dysmorphic disorder patients for mirror gazing. [2]
