CAMBRIDGE INTERNATIONAL EXAMINATIONS

GCE Advanced Level

MARK SCHEME for the May/June 2014 series

9706 ACCOUNTING

9706/41 Paper 4 (Problem Solving [Supplement]), maximum raw mark 120

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2014 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

[11]

(d) Dividend yield for XY limited

$$\frac{[100\,000 \times 8\%]\,\mathbf{(1)} \div 100\,00\,\mathbf{(1)}}{\$2\,\mathbf{(1)}} \times 100 = \frac{\$0.08}{\$2} \times 100 = 4\%\,\mathbf{(1)\ of}$$ **[4]**

(e) Dividend cover for XY limited
$24 000 **(1)** ÷ $8 000 **(1) of** = 3 times **(1) of** **[3]**

(f) Option 1 will provide Tan with a return on his investment of 4% **(1) of**. He can buy $67 500 ÷ 2 share = 33 750 shares **(1) of** which will give him income of 33 750 × $0.08 = $2 700 **(1) of**.

Option 2 will provide him with no return until year 2 **(1)**. This will be just over 2.9% **(1)** ($2000 ÷ 67500) **(1)**.

Option 3 will give a return of 5% **(1)** ($67500 × 5% = $3375) **(1 of)**.

Option 1 may lead to both an increase in dividends in the future **(1)** and also possible capital growth in the value of the share **(1)**. The company looks reasonably secure with a dividend cover of 3 times **(1)** The shareholder would have voting rights **(1)** but no management role **(1)**. Dividends are not guaranteed but dependent on level of distributable profits. **(1)**. Limited liability **(1)**.

Option 2 is less secure **(1)** as his figures are only projections which may or may not happen **(1)**. unlimited liability **(1)**. He will be his own boss **(1)** but this comes with responsibilities **(1)** He can have all available profits but is also liable to all the losses **(1)**.

Option 3 is a safe return **(1)** but no chance of any growth of income or capital **(1)**. guaranteed return **(1)** fixed return **(1)**.

2 marks per option (1) per advantage (1) per disadvantage.
(1) decision (0 – 2) justification. **[Max 9]**

(b)

Year	10% Factor	Net cash flow	Net present value	
0	1.000	(200 000)	(200 000)	
1	0.909	50 000	45 450	**(1) of**
2	0.826	54 300	44 852	**(1) of**
3	0.751	58 839	44 188	**(1) of**
4	0.683	63 630	43 459	**(1) of**
5	0.621	68 686	42 654	**(1) of**
Net present value **(1)**			**20 603**	**(1) of**

[7]

(c) \$95 455 **(1) of** / 5 **(1)** = \$19 091 **(1) of**
19 091 / (200 000 / 2) **(1)** × 100 = 19.09% **(1) of** **[5]**

(d)

Year	40% Factor	Net cash flow	Net present value	
0	1.000	200 000	– 200 000	**(1)**
1	0.714	50 000	35 700	
2	0.510	54 300	27 693	
3	0.364	58 839	21 417	**(1) of** if 40% D.F used
4	0.260	63 630	16 544	
5	0.186	68 685	12 775	
Total			– 85 870	**(1) of**
Internal rate of return			**15.81%**	

10% **(1)** + [30% **(1)** × \$20 603 / \$(20 603 + 85 870) **(1) of**] = 15.81% **(1) of** **[7]**

(e) Drake should invest in Project Sylvania **(1)**, because the accounting rate of return is greater **(1) of**, the net present value is greater **(1) of**, and the internal rate of return is greater **(1) of** than Project Utopia. **[4]**

(f) Interest would not be charged to the project **(1)**, therefore the profits should be higher **(1)**. This will result in a higher accounting rate of return **(1)**.
ARR = 195 455 / 5 = 39 091 **(1) of** / 100 000 **(1)** = 39.09% **(1) of**. **[6]**

(g) Preference shares fixed dividend **(1)** in priority to ordinary shareholders **(1)**.
Debenture secured on the asset **(1)**. Interest charged may be at a lower rate than on the bank loan **(1)**. Interest is charged before dividend is paid to ordinary and preference shareholders **(1)**.
Sale of surplus non current assets **(1)** as long as this does not affect trading **(1)**.
Venture capitalist could invest **(1)** but would require a return on his investment **(1)**

Accept other reasonable alternatives. **[Max 4]**
