#### **CAMBRIDGE INTERNATIONAL EXAMINATIONS**

**GCE Advanced Level** 

# MARK SCHEME for the October/November 2013 series

# 9706 ACCOUNTING

9706/42

Paper 4 (Problem Solving – Supplement), maximum raw mark 120

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

(b) (i) Cash budget is prepared in advance (2) but a cash flow statement is prepared after the end of an accounting period (2). The cash budget is produced for management and does not have prescribed format (2). The cash flow statement is prepared using a prescribed format, IAS7 (2). Shareholders would review the statement of cash flows (2).

[Max 4]

(ii) To give information in financial statements on link between cash and profit or loss

To give information on cash flows to management

To give information on cash flows to other interested parties e.g. bank

To take management decisions on

Working capital

Non-current asset investment

Dividend policy

Redeeming or issuing new shares or debentures

[other relevant points]

2 × 2 marks each [4]

(c) Carrying value is compared to highest of (1) recoverable amount and value in use (1). If this amount is lower than carrying value the asset is impaired (1). It is written off in the income statement (1).

(d) Yes (1of). Profit is higher (1of).

[2]

- (e) (i) Share issue, debentures, bank loan, disposal of surplus non-current assets, debt factoring [2]
  - (ii) Public issue
    - expensive
    - needs underwriting to ensure success
    - requires prospectus
    - dilutes control
    - no legal necessity to pay dividend in a bad year

## Right issue

- no dilution of control
- generally cheaper
- no legal necessity to pay dividend in a bad year

#### Debenture issue/loan

- interest is always payable
- may require security/floating charge
- needs to be paid back/redeemed
- interest is charged against profit
- no votes in general meeting

### Disposal of non-current assets

- no loss of control within ownership
- no costs/bank charges
- immediate cash
- but may lead to insufficient assets as business grows

#### Debt factoring

- immediate cash
- there is a cost associated with factoring and not all of the debt will be collected
