One of the directors suggests that production of the Hazel shampoo should be stopped and resources should be concentrated on the production of the Aloe and Peach shampoos.

If this decision is implemented:

- The sales of Aloe and Peach shampoos are forecast to increase by 10% each;
- There will be no increase in the selling price;
- The rates for variable costs will remain unchanged;
- Higher marketing costs will increase the total fixed costs to \$550 000.

REQUIRED

- (d) Prepare a statement showing the expected **net** profit or loss for the Aloe and Peach shampoos and the **total** expected **net** profit for the 6 months ending 30 April 2013.

Using the overhead recovery rate of \$13.00 per direct labour hour clearly show any fixed overhead over/under absorbed.
