GCE Advanced Subsidiary Level and GCE Advanced Level

MARK SCHEME for the October/November 2012 series

9706 ACCOUNTING

9706/23

Paper 2 (Structured Questions – Core),
maximum raw mark 90

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2012 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

- (e)** Customers paying full price will be annoyed to discover others paying less.
Possible business will be taken elsewhere.

Reaction of competitors needs consideration – price wars.

Will acceptance of the offer take up capacity that could be better used for future full price business?

An over reliance on special orders is not a long term solution and the company should put priority on achieving full price orders.
