**October/November 2017**

MARK SCHEME

Maximum Mark: 150

---

**Published**

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2017 series for most Cambridge IGCSE<sup>®</sup>, Cambridge International A and AS Level components and some Cambridge O Level components.

Question	Answer	Marks																																																
1(a)	<table style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 40%;"></th> <th style="width: 20%; text-align: right;">\$</th> <th style="width: 20%;"></th> <th style="width: 20%; text-align: right;">\$</th> </tr> </thead> <tbody> <tr> <td>Revenue</td> <td style="text-align: right;">45 000</td> <td></td> <td></td> </tr> <tr> <td>Cost of sales</td> <td></td> <td></td> <td></td> </tr> <tr> <td>Opening inventory</td> <td style="text-align: right;">825</td> <td style="text-align: right;">(1)</td> <td></td> </tr> <tr> <td>Purchases</td> <td style="text-align: right;">28 700</td> <td style="text-align: right;">(2)</td> <td></td> </tr> <tr> <td></td> <td style="text-align: right;">29 525</td> <td></td> <td></td> </tr> <tr> <td>Closing inventory</td> <td style="text-align: right;"><u>(1 650)</u></td> <td style="text-align: right;">(1 OF)</td> <td style="text-align: right;"><u>(27 875)</u> (1OF)</td> </tr> <tr> <td>Gross profit</td> <td></td> <td></td> <td style="text-align: right;">17 125 (1 OF)</td> </tr> <tr> <td>Deduct:</td> <td></td> <td></td> <td></td> </tr> <tr> <td>Insurance</td> <td style="text-align: right;">3425</td> <td style="text-align: right;">(2)</td> <td></td> </tr> <tr> <td>Electricity</td> <td style="text-align: right;"><u>775</u></td> <td style="text-align: right;">(1)</td> <td style="text-align: right;"><u>(4 200)</u></td> </tr> <tr> <td>Restaurant profit</td> <td></td> <td></td> <td style="text-align: right;"><u>12925</u> (1 OF)</td> </tr> </tbody> </table> <p>Purchases 28 350 – 1750 (1) + 2100 (1) = 28 700  Insurance (4800 + 950 + 1100) (1) × 50% = 3425 (1OF)</p>		\$		\$	Revenue	45 000			Cost of sales				Opening inventory	825	(1)		Purchases	28 700	(2)			29 525			Closing inventory	<u>(1 650)</u>	(1 OF)	<u>(27 875)</u> (1OF)	Gross profit			17 125 (1 OF)	Deduct:				Insurance	3425	(2)		Electricity	<u>775</u>	(1)	<u>(4 200)</u>	Restaurant profit			<u>12925</u> (1 OF)	<b>10</b>

2(b)	It is not included in the statement of financial position/statement of changes in equity, <b>(1)</b> but as a note to the financial statements. <b>(1)</b>	<b>2</b>																																								
2(c)	This is a non-adjusting event <b>(1)</b> as per IAS 10, <b>(1)</b> which is material/significant to the business. <b>(1)</b> Thus it is disclosed in the notes to the financial statements for 2016. <b>(1)</b> It will be recorded in the 2017 financial statements. <b>(1)</b>  <b>Max 3</b>	<b>3</b>																																								

Question	Answer	Marks
2(d)	<p>The ratio may indeed fall in the short term as non-current assets increase. (1)  Once the new factory is established, sales revenue or profit should rise too. (1)  The ratio may actually rise in due course. (1)  Shareholders are more interested in profits and dividends. (1)  The disclosure of the purchase enables users of the financial statements to make informed comparisons. (1)  Directors do not need to be greatly concerned. (1)</p> <p>The directors should be concerned (1) as shareholders may sell their shares, (1) which may reduce the market price of their shares. (1) Shareholder confidence may fall. (1) New shareholders may not be attracted to buy shares in the future. (1) The shareholders may dismiss the directors. (1)  <b>Decision (1)</b>  <b>Justification Max 2 for positive + Max 2 for negative</b></p>	5
2(e)	<p>It increases the value of non-current assets in the statement of financial position. (1)  It increases/creates the revaluation reserve in the statement of financial position. (1)  It reduces the accumulated depreciation. (1)  It is recorded in the statement of changes in equity. (1)  <b>Max 3</b></p>	3

Question	Answer	Marks
3(a)(i)	<p>Stewardship is the responsibility which managers/directors have for the management of resources (1) within a business on behalf of the owners/shareholders. (1)</p>	2
3(a)(ii)	<p>The directors have responsibility as stewards of the company to report (1) at the AGM (1) to the shareholders on the performance of the company. (1) To maintain proper accounting records. (1) Responsible for the preparation of financial statements. (1) Manage the business on a day to day basis. (1) Safeguard the assets. (1)  <b>Max 2</b></p>	2
3(a)(iii)	<p>External auditors are appointed by the shareholders to carry out an audit, which is a systematic and independent examination (1) of books, accounts, documents and vouchers of an organization, (1) to ascertain how far the financial statements present a true and fair view of the business (1) and comply with IAS/Companies Acts. (1) To prepare an audit report expressing an opinion. (1)  <b>Max 2</b></p>	2

Question	Answer	Marks																																												
3(b)(i)	<table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 30%;"></td> <td style="width: 30%; text-align: center;">\$</td> <td style="width: 30%; text-align: center;">\$</td> <td></td> </tr> <tr> <td>Sales</td> <td></td> <td style="text-align: right;">182 000</td> <td></td> </tr> <tr> <td>Less: returns</td> <td style="text-align: right;">(8 000) (1)</td> <td></td> <td></td> </tr> <tr> <td style="padding-left: 20px;">sale or return</td> <td style="text-align: right;">(6 000) (1)</td> <td></td> <td></td> </tr> <tr> <td></td> <td></td> <td style="text-align: right;">168 000</td> <td></td> </tr> <tr> <td>Purchases</td> <td style="text-align: right;">154 000</td> <td></td> <td></td> </tr> <tr> <td>Less: returns</td> <td style="text-align: right;">12 000</td> <td></td> <td></td> </tr> <tr> <td></td> <td style="text-align: right; border-top: 1px solid black;">142 000 (1)</td> <td></td> <td></td> </tr> <tr> <td>Closing inventory</td> <td style="text-align: right; border-top: 1px solid black;">74 800 (1 OF)</td> <td></td> <td></td> </tr> <tr> <td>Cost of sales</td> <td></td> <td style="text-align: right; border-top: 1px solid black;">67 200 (1 OF)</td> <td></td> </tr> <tr> <td>Gross profit</td> <td></td> <td style="text-align: right; border-top: 1px solid black; border-bottom: 3px double black;">100 800</td> <td></td> </tr> </table>		\$	\$		Sales		182 000		Less: returns	(8 000) (1)			sale or return	(6 000) (1)					168 000		Purchases	154 000			Less: returns	12 000				142 000 (1)			Closing inventory	74 800 (1 OF)			Cost of sales		67 200 (1 OF)		Gross profit		100 800		<b>5</b>
	\$	\$																																												
Sales		182 000																																												
Less: returns	(8 000) (1)																																													
sale or return	(6 000) (1)																																													
		168 000																																												
Purchases	154 000																																													
Less: returns	12 000																																													
	142 000 (1)																																													
Closing inventory	74 800 (1 OF)																																													
Cost of sales		67 200 (1 OF)																																												
Gross profit		100 800																																												
3(b)(ii)	168 000 × 60% (3/5) = \$100 800 <b>(1OF)</b>	<b>1</b>																																												
3(c)	<p>Percentage change is 100 800 – 50 000 (100 800 – *50 800) <b>(1OF)</b> = 50 800 <b>(1OF)</b> / 100 800 = 50.4% <b>(1OF)</b></p> <p>* 74 800 – 24 000</p>	<b>3</b>																																												
3(d)	<p>Reasons for closing inventory to be different than as per records:</p> <p>Inventory has been stolen/damaged <b>(1)</b> due to little control. <b>(1)</b></p> <p>Inventory is obsolete, <b>(1)</b> so has no value in reality but might in the inventory records. <b>(1)</b> Sales have been omitted in the records, <b>(1)</b> i.e. Inventory has been sent out on consignment or a sale or return basis, so not yet sold. <b>(1)</b></p> <p>Purchases of inventory have been recorded twice, <b>(1)</b> or not all inventory was counted. <b>(1)</b> Sales returns were amended in the records <b>(1)</b> but the purchases returns were not. <b>(1)</b></p> <p><b>2 marks × Max 3 points</b> (1 mark for stating and 1 mark for developing)</p>	<b>6</b>																																												
3(e)	<p>If book value is used, profit and current assets would be overstated <b>(1OF)</b> which is against the prudence concept <b>(1)</b> and does not give a true and fair view. <b>(1)</b> Inventory should be recorded at the lower of cost and net realisable value, <b>(1)</b> in line with IAS2 <b>(1)</b>. Therefore the warehouse inventory valuation should be used. <b>(1)</b></p> <p>1 for decision + max 3 for comments</p>	<b>4</b>																																												

Question	Answer				Marks
4(a)(i)(ii) (iii)(iv)	Income gearing Gearing ratio Dividend cover Price earnings ratio*	235 000 / 1 580 000 or 234 800 / 1 580 000 2 935 000 / (2 935 000 + 4 540 000) 1 345 000 / 325 000	14.87% 14.86% 39.26% 4.14 times 3.44(times)	(1) (1) (1) (2)	5
*EPS = 1345 / 3000 = 0.45 (1) PE ratio = 1.55 / 0.45 = 3.44 (1OF)					
4(b)(i)	Profit from operations Finance costs (200 000 + 235 000) Profit for the year	\$000 1600 (435) <u>1165</u>	(1) (1) OF	2	
4(b)(ii)	Equity and liabilities Ordinary share capital Share premium Retained earnings Total equity  Non-current liabilities 8% debentures 2020 10% debentures 2026	\$000 1500 500 <u>3430</u> <u>5430</u>  2935 <u>2000</u> 4935	(1) (1) both	2	
*Retained earnings = 2 540 000 + (1 600 000 – [435 000 + 275 000]) = 3 430 000 or (2 540 000 + 1 165 000 – 275 000) = 3 430 000					
4(c)(i)	Income gearing Gearing ratio Dividend cover Price earnings ratio	27.19% 27.18% 47.61% 4.24 times 3.33 times	(1 OF) (1 OF) (1 OF) (1 OF)	4	Workings 435 000 / 1 600 000 or 434 800 / 1 600 000 4 935 000 / 10 365 000 1 165 000 / 275 000 1 165 000 / 3 000 000 = 0.39 1.30 / 0.39 = 3.33

Question	Answer	Marks
4(c)(ii)	<p>Income gearing has increased <b>(1)</b> significantly from 2016 because of extra interest payable on debentures. This is worse <b>(1)</b> for a shareholder. This will reduce profit available to equity holders and therefore also impact other investment ratios. <b>(1)</b> <b>(Max 2)</b></p> <p>The gearing ratio has also increased <b>(1)</b> because of the debenture issue being a greater increase than the increase in retained earnings. <b>(1)</b> This increases the risk <b>(1)</b> of the company because of the need to pay interest and repay debt. <b>(1)</b> <b>(Max 2)</b></p> <p>Dividend cover has stayed reasonably stable/increased <b>(1)</b> over the two years – as the profit available for distribution has decreased <b>(1)</b>, so have the dividends. <b>(Max 2)</b></p> <p>The price earnings ratio has decreased <b>(1)</b>. This is also a reflection of the market price of a share and the risk attached to it, depending on the market confidence. <b>(1)</b> <b>(Max 2)</b></p>	8
4(d)	<p>The issue of the debentures had an adverse <b>(1)</b> effect on the income gearing and gearing ratios. The company is now seen to be more risky. <b>(1)</b> The company may be perceived as being less attractive to investors. <b>(1)</b></p> <p>The company has had to pay additional finance costs. <b>(1)</b> This has reduced profits available to distribute to shareholders. <b>(1)</b> This may have a negative effect on its liquidity. <b>(1)</b></p> <p>The company has a significant repayment commitment <b>(1)</b> and annual interest payment, <b>(1)</b> for which the directors need to plan if profits fall. <b>(1)</b></p> <p>Debentures may be secured on the assets of the company <b>(1)</b> which may mean the asset is sold to repay it, if necessary. <b>(1)</b></p> <p>1 for comment + 1 for development</p> <p><b>2 marks × Max 2 points</b> (1 mark for stating and 1 mark for developing)</p>	4

Question	Answer	Marks																																				
5(a)	Payback does not consider the time value of money, <b>(1)</b> whereas net present value does. <b>(1)</b> Payback calculates the time it takes to cover the initial cost of the investment and does not consider the net cash flow after the payback period. <b>(1)</b> Net present value considers the discounted cash flows for the whole life of the investment. <b>(1)</b>	<b>4</b>																																				
5(b)	Net present value is:  <table style="margin-left: auto; margin-right: auto;"> <tr> <td></td> <td style="text-align: right;">\$</td> <td></td> </tr> <tr> <td style="text-align: right;">Cost</td> <td></td> <td style="text-align: right;">(55 000.00)</td> </tr> <tr> <td style="text-align: right;">Total present values</td> <td></td> <td style="text-align: right;">55 700.75</td> </tr> <tr> <td style="text-align: right;">Net present value</td> <td style="border-top: 1px solid black;"></td> <td style="text-align: right; border-top: 1px solid black;">700.75 <b>(1)</b></td> </tr> </table>		\$		Cost		(55 000.00)	Total present values		55 700.75	Net present value		700.75 <b>(1)</b>	<b>1</b>																								
	\$																																					
Cost		(55 000.00)																																				
Total present values		55 700.75																																				
Net present value		700.75 <b>(1)</b>																																				
5(c)(i)	Annual net cash flows:  <table style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th style="text-align: center;">Year</th> <th style="text-align: center;">Present value \$</th> <th style="text-align: center;">Discount factor</th> <th style="text-align: center;">Net cash flows \$</th> <th></th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">1</td> <td style="text-align: right;">3 683.40</td> <td style="text-align: center;">0.877</td> <td style="text-align: right;">4 200</td> <td style="text-align: right;"><b>(1)</b></td> </tr> <tr> <td style="text-align: center;">2</td> <td style="text-align: right;">6 536.50</td> <td style="text-align: center;">0.769</td> <td style="text-align: right;">8 500</td> <td style="text-align: right;"><b>(1)</b></td> </tr> <tr> <td style="text-align: center;">3</td> <td style="text-align: right;">9 483.75</td> <td style="text-align: center;">0.675</td> <td style="text-align: right;">14 050</td> <td style="text-align: right;"><b>(1)</b></td> </tr> <tr> <td style="text-align: center;">4</td> <td style="text-align: right;">14 977.60</td> <td style="text-align: center;">0.592</td> <td style="text-align: right;">25 300</td> <td style="text-align: right;"><b>(1)</b></td> </tr> <tr> <td style="text-align: center;">5</td> <td style="text-align: right;">21 019.50</td> <td style="text-align: center;">0.519</td> <td style="text-align: right;">40 500</td> <td style="text-align: right;"><b>(1)</b></td> </tr> </tbody> </table>	Year	Present value \$	Discount factor	Net cash flows \$		1	3 683.40	0.877	4 200	<b>(1)</b>	2	6 536.50	0.769	8 500	<b>(1)</b>	3	9 483.75	0.675	14 050	<b>(1)</b>	4	14 977.60	0.592	25 300	<b>(1)</b>	5	21 019.50	0.519	40 500	<b>(1)</b>	<b>5</b>

5	40 500	55 – 25 = 30	<b>(1)</b>		1350 <b>(1 OF)</b>																																	

Question	Answer	Marks
5(d)	<p>The machine has a positive net present value, but it is very small. (1)  The payback is within the life of the machine. However, it is very late by being in the fifth year. (1)</p> <p>Wong Ho should purchase the machine as it has a positive net present value (1), it pays back within the life of the machine (1) and it increases the production level. (1)</p> <p>Wong Ho should not purchase the machine as the data is all estimated (1) and could be wrong. If the small positive net present value becomes negative, (1) the payback does not happen in the lifetime and the production does not exceed the current production levels. (1) There may be additional potential costs, (1) such as training. (1)</p> <p><b>1 for decision and max 4 for explanation</b></p>	<b>5</b>
