**International General Certificate of Secondary Education** 

# MARK SCHEME for the October/November 2011 question paper for the guidance of teachers

## 0445 DESIGN AND TECHNOLOGY

0445/33

Paper 3 (Resistant Materials), maximum raw mark 50

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

## Section A

| 1  | (a) Seasoning is the drying out of wood [after it has been converted],<br>to reduce shrinkage/warping.                 |     | (A)               |
|----|------------------------------------------------------------------------------------------------------------------------|-----|-------------------|
|    | (b) Kiln or artificial seasoning.                                                                                      |     | [1]               |
| 2  | Award 0–2 dependent upon accuracy of drawing.                                                                          |     | [2]               |
| 3  | (a) Tang correctly labelled.                                                                                           |     | [1]               |
|    | (b) Safe edge correctly labelled.                                                                                      |     | [1]               |
| 4  | Three pieces of information include: quantity, length, material, type of head and gauge.  Size is too vague = 0 marks. | 3x1 | [3]               |
| 5  | A: mould/die. B: hopper. C: feed screw/screw.                                                                          |     | [1]<br>[1]<br>[1] |
| 6  | Award 0–3 dependent upon accuracy of drawing.                                                                          |     | [3]               |
| 7  | (a) Surform.                                                                                                           |     | [1]               |
|    | (b) Quick removal of wood. Not to make smooth.                                                                         |     | [1]               |
| 8  | (a) Handle: phenol formaldehyde, specifically named hardwood. Reason: heat resistant/insulator.                        |     | [1]<br>[1]        |
|    | (b) Saucepan body: aluminium, copper, stainless steel, cast iron. Reason: conducts heat well.                          |     | [1]<br>[1]        |
| 9  | Award 0–2 dependent upon accuracy of drawing.                                                                          |     | [2]               |
| 10 | (a) Centre lathe operation: knurling.                                                                                  |     | [1]               |

[1]

(b) To improve/increase grip.

|        | IGCSE – October/November 2011  | 0445     |  |

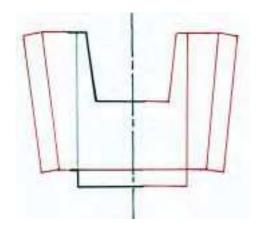

12 (a) (i) Two items of research include: quantity of leaflets to be stored, sizes of leaflets

(ii) Two reasons for making a model include: to check sizes, overall appearance, to avoid costly mistakes later.

[1] [1]

[1] [1]

(b) (i)

Allow horizontal lines on top of backs.

| Complete base:                                             | 1   |     |
|------------------------------------------------------------|-----|-----|
| Complete 2 backs: [allow horizontal lines on top of backs] | 2x1 |     |
| Accuracy and proportion.                                   | 1   | [4] |

(ii) Two marking out tools include: chinagraph pencil, felt marker, scriber, rule, try square.

(c) Cut out: use of Hegner saw or equivalent, band saw, coping saw.

Accuracy of technical detail in sketch:

0–3

Make smooth: use of hand/flat files to line, scraper, wet and dry.

Accuracy of technical detail in sketch:

0–3 [6]

(d) Marking out: use of scriber, dividers. 0–1

Drill holes using drilling machine. 0–1

File to open up slot. 0–1 [3]

(e) Strip heater/line bender. 0–2

Use of former or equivalent to form bends with method of retention. 0–2

Accuracy of technical detail. 0–2 [6]

| Page 5 | Mark Scheme: Teachers' version | Syllabus | . P. |
|--------|--------------------------------|----------|------|
| •      | IGCSE – October/November 2011  | 0445     | 120  |

13 (a) (i) Adjustable to allow magnifying glass to examine different size objects.

File ends to radii using vice to secure and hand/flat files.

- (ii) Heavy to prevent being moved about or knocked easily, stability.
- (iii) Horizontal to prevent objects falling or sliding off, retain same distance from glass.
- **(b) (i)** Wing nut. [1]
  - (ii) Can be tightened effectively without use of spanner. [1]
- (c) (i) Marking out using combination of scriber, rule, odd leg calipers, try square, centre/dot punch, hammer. 0–2

  Drill holes using drilling machine. Method of clamping, hand vice etc. 0–2
  - (ii) Make sure two components identical by taping together and shaping as one piece or make one then use first one as a template for the second. [2]

0-2

[6]
