Paper 4 Written Paper MARK SCHEME Maximum Mark: 75

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2018 series for most Cambridge IGCSE[™], Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

IGCSE[™] is a registered trademark.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Question	Answer	Marks
1(a)	1 mark per fact	2
	14 direct(london, rome). 15 flies(rome, british_air).	
1(b)	<pre>1 mark per bullet: palma salzburg K = palma, salzburg</pre>	2
1(c)	 1 mark per bullet: direct glasgow, M direct (glasgow, M). 	2
1(d)	<pre>1 mark per bullet: • flies(Z,X) • AND • direct(Z, Y) flies(Z, X) AND direct(Z, Y)</pre>	3
1(e)	YES	1

Question	Answer	Marks
2(a)	1 mark for each completed statement	7
	01 MaxIndex <- 20	
	02 NumberItems	
	03 FOR Outer ← 1 TO MaxIndex - 1 // 19	
	04 FOR Inner \leftarrow 1 to NumberItems	
	05 IF ItemList[Inner] > ItemList[Inner + 1]	
	06 THEN	
	07 Temp	
	08 ItemList[Inner]	
	09 ItemList[Inner + 1] ← Temp	
	10 ENDIF	
	11 ENDFOR	
	12 NumberItems - 1	
	13 ENDFOR	
2(b)(i)	1 mark per bullet	2
	 Iterations continue // it continues doing comparisons after the array is sorted 	
2(b)(ii)	1 mark per bullet to max 3	3
	Use of a flag to indicate if any swaps have taken place	
	 If the inner loop has made all comparisons with no changes flag/value set accordingly 	
	 flag/value set accordingly A comparison checks the flag/value at the end of each inner loop 	
	if it is sorted it breaks out/stops	

May/June 2	018
------------	-----

Question	Answer	Marks
2(c)	1 mark per bullet to max 4	4
	 e.g. When the list is almost sorted because it will stop as soon as it is sorted When there are a large number of data items because it will perform fewer comparisons/loops 	

Question	Answer	Marks
3(a)	1 mark per bullet	5
	 OpenAccount, OperateAccount and Close Account on same level RequestCloseAccount under OperateAccount SubscriptionDue under RequestCloseAcount Make Payment and PlaySong under SubscriptionDue Correct selection and iteration throughout 	

Question	Answer	Marks
Question 4(a)	1 mark per bullet C, D and E all coming from 3 G following D and E F following C H from 6 to 7 I from 7 to 8 4 C F 1 6 8 3 5 5 2 6 5 7 3 8 F 6 H 7 1 8	Marks 5
4(b)	1 mark per bullet • A→B→E→G→H→I • 30 days	2
4(c)	 1 mark per bullet Earliest start time: 19 days Latest finish time: 22 days 	2

Question	Answer	Marks
Question 5(b)	<pre>1 mark per bullet to max 6 • class declaration • private declaration of five attributes • constructor declaration •initialisation of attributes to the parameter values • declaration of GetDetails function • appropriate concatenation of string using attributes • return of all 5 values in one string Python example code: class GameElement: definit(self, PositionX, PositionY, Width, Height,</pre>	Marks 6
	selfHeight = Height	
	return Message	

Question	Answer	Marks
5(b)	Visual Basic example code:	
	Class GameElement Private PositionX As Integer Private PositionY As Integer Private Width As Integer Private Height As Integer Private ImageFilename As String	
	<pre>Public Sub New(ByVal X As Integer,ByVal Y As Integer, ByVal W As Integer, ByVal H As Integer, Filename As String) PositionX = X PositionY = Y Width = W Height = H ImageFilename = Filename End Sub</pre>	
	<pre>Public Function GetDetails() Dim Message As String Message = "PositionX: " + PositionX + "PositionY: " +</pre>	
	Return Message End Function End Class	

May/June 2	01	8
------------	----	---

Question	Answer	Marks
5(b)	Pascal example code:	
	type GameElement = class	
	private DesitionX - Interent	
	PositionX : Integer; PositionY : Integer;	
	Width : Integer;	
	Height : Integer;	
	ImageFilename : String;	
	public	
	Constructor init(X, Y, W, H:Integer; Filename: String);	
	Function GetDetails() : String;	
	end;	
	Constructor GameElement.init(X, Y, W, H:Integer; Filename: String);	
	begin	
	PositionX := X;	
	PositionY := Y; Width := W;	
	Height := H;	
	ImageFilename := Filename;	
	end;	
	Function GameElement.GetDetails() : String;	
	var Message:String;	
	begin	
	<pre>Message = "PositionX: " + PositionX + "PositionY: " + PositionY + ", width: " + Width + ", height: " + Height + ",</pre>	
	ImageFilename:" + ImageFilename;	
	Result = Message	
	end;	

Question	Answer	Marks
5(c)	Max 4 from each section to max 6 overall	6
	1 mark per bullet to max 4	
	class declaration with inheritance	
	constructor declaration	
	taking all 5 parameters and CauseDamage, DamagePoints parameters	
	with inheritance constructor call	
	• Declaring CauseDamage, DamagePoints private and assigning parameters	
	1 mark per bullet to max 4	
	• Function declaration for GiveDamagePoints	
	•checking if CauseDamage = True	
	•returning DamagePoints if true	
	else returning appropriate value e.g1/null/blank	
	Python example code:	
	<pre>class Scenery(GameElement): definit (self, PositionX, PositionY, Width, Height,</pre>	
	if(selfCauseDamage):	
	return selfDamagePoints else:	
	return 0	

Question	Answer	Marks
5(c)	Visual Basic example code:	
	Class Scenery	
	Inherits GameElement	
	Private CauseDamage As Boolean Private DamagePoints As Integer	
	<pre>Public Sub New(ByVal X As Integer,ByVal Y As Integer, ByVal W As Integer, ByVal H As Integer,Filename As String, ByVal CD As Boolean, ByVal DP As Integer) MyBase.New(X, Y, W, H, Filename) CauseDamage = CD DamagePoints = DP</pre>	
	End Sub Public Function GiveDamagePoints() As Integer If (CauseDamage) Then Return DamagePoints Else Return 0	
	End if End Function	
	End Class	

Question	Answer	Marks
5(c)	Pascal example code:	
	<pre>Scenery = class(GameElement) private CauseDamage : Boolean; DamagePoints: Integer; public Constructor init(X, Y, W, H: Integer; Filename: String; CD:Boolean; DP: Integer); override; Function GiveDamagePoints() : Integer; end; constructor Scenery.init(X, Y, W, H: Integer; Filename: String; CD: Boolean; DP: Integer); begin inherited init(X, Y, W, H, Filename); CauseDamage := CD; DamagePoints := DP; end; Function Scenery.GiveDamagePoints() : Integer; begin if (CauseDamage): Result := DamagePoints else: Result := 0; end;</pre>	

Question	Answer	Marks
5(d)(i)	1 mark per bullet	3
	 Variable GiftBox assigned value Call Scenery With all 7 parameters assigned correctly 	
	Python example code:	
	GiftBox = Scenery(150, 150, 50, 75, "box.png", True, 50)	
	Visual Basic example code:	
	GiftBox = Scenery(150, 150, 50, 75, "box.png", True, 50)	
	Pascal example code: GiftBox := Scenery(150, 150, 50, 75, "box.png", True, 50)	

May/June 2	2018
------------	------

Question	Answer	Marks
5(d)(ii)	1 mark per bullet	3
	Function declaration with no parameters	
	• Use inherited GetDetails method to get string	
	Return all values	
	<pre>def GetScenery(self):</pre>	
	Message = Object.GetDetails(self)	
	Message = Message + " Causes Damage:", self.CauseDamage, "Damage	
	Points:", self.DamagePoints	
	return Message	
	Visual Basic example code:	
	Public Function GetScenery() As String	
	Dim Message As String	
	Message = MyBase.GetDetails()	
	Message = Message + "CauseDamage: " + CauseDamage + "	
	DamagePoints: " + DamagePoints	
	Return Message End Function	
	Pascal example code:	
	Function Secenery.GetScenery(): String	
	Var Message : String	
	Begin	
	<pre>Message := GetDetails();</pre>	
	Message := Message + "CauseDamage: " + CauseDamage + " DamagePoints: " + DamagePoints;	
	Result:=Message;	
	End;
